Charging Station, North Carolina

Values

- Protecting Treasured Places
- Promoting Energy Independence
- Advancing a Clean Energy Economy
- Creating Job Opportunities
- Saving Energy and Saving Money
- Empowering Diverse Constituencies
- Ensuring Safe, Healthy Communities

Join SACE Today!

Strengthen the Call for a Clean Energy Future

Your membership creates awareness of critical energy issues throughout the Southeast.

Together we will educate decision makers and consumers about the impacts of our energy use, and raise awareness of clean energy solutions.

Decisions utilities in our region make today will affect our electric power generation mix and dictate public health and quality of life in our region for decades.

To learn more about the benefits of being a member, please visit our website or call 865.637.6055

After more than 30 years, SACE remains the only regional organization solely focused on transforming the way we produce and consume energy in the Southeast. Armed with unique technical expertise, we aggressively advocate for utilities to adopt solutions that will help our region meet energy demand using safer, cleaner, and less expensive resources.

By embracing energy efficiency and clean renewable energy, utilities can permanently retire old, dirty, inefficient coal-fired power plants without jeopardizing reliability. This will help reduce air and water pollution, and improve public health in communities throughout our region.

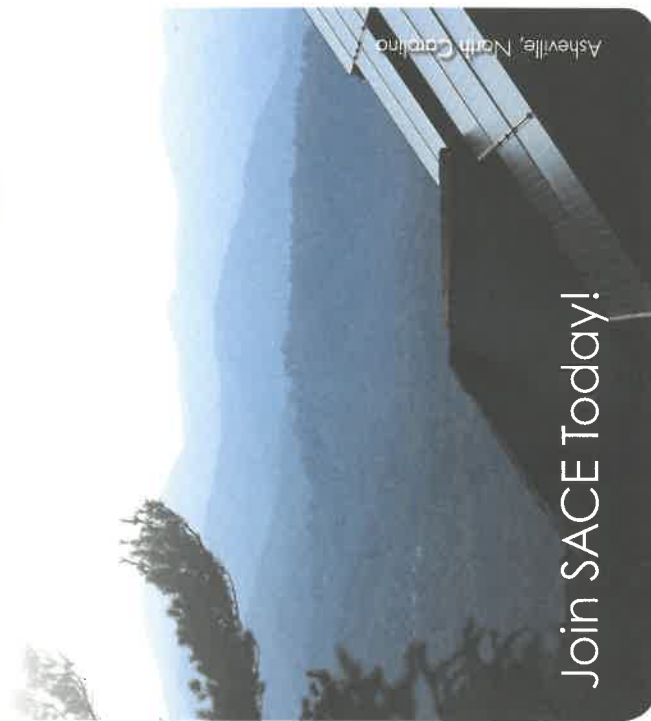

Miami Beach, Florida

Our Integrated Approach Includes:

-  Advocating for Climate Action
-  Promoting Clean Energy
-  Supporting Clean Fuels
-  Encouraging Energy Efficiency
-  Opposing High Risk Energy

SACE believes energy decisions should be fair and equitable. We work to reform utility planning processes in order to protect consumers and rate-payers. Our goal is to ensure utilities in our region use open, transparent, integrated methods when creating long-term energy plans, and that they are held accountable by regulators working to protect the public interest.
