Docket No. 50-397

December 2, 1975  
G02-75-329

Director of Nuclear Reactor Regulation  
Attn: Olan D. Parr, Chief  
Light Water Reactors Project Branch 1-3  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Subject: WPPSS NUCLEAR PROJECT NO. 2  
MAIN STEAM ISOLATION VALVE  
LEAKAGE CONTROL SYSTEM

Reference: Letter, O. D. Parr to J. J. Stein, entitled "Main Steam Isolation Valve Leakage Control System," dated November 21, 1975 (GI2-75-162).

Dear Mr. Parr:

With regard to your referenced request for a commitment to provide an interlock prohibiting depressurization of the main steamline if the inboard main steam isolation valve fails to close, we are currently studying the feasibility of providing the desired interlock. We anticipate it will take until January 2, 1976, to determine whether the additional interlock to prevent inadvertent actuation of the main steam isolation valve leakage control system can be accommodated. At that time we will inform you of our determination.

Very truly yours,

  
N. O. STRAND  
Assistant Director  
Generation and Technology
