Subject: Draft Criteria for Tier 2* Critical Sections (LAR 17-037)

To All –

For the critical sections Tier 2* information, the staff proposes the following license condition language for discussion at a future public meeting:

- Involve analysis or design methodology, including design codes, analytical assumptions, or structural materials that deviate from those credited in the plant-specific DCD for critical sections,
- Result in a change to the steel-concrete (SC) module walls in the Nuclear Island or a change to the Shield Building, including SC-to-reinforced concrete (RC) connections,
- Result in a change to the demand to capacity ratio (area of steel provided to that specified in the plant-specific DCD) of a critical section of the structure,

Thank you

Don Habib
