Regulatory Docket File

Dear Mr. Boyd:

In response to your letter of March 9, 1977; this will inform you that the feasibility of constructing two replicate units at either the Palo Verde site or an alternate site in the southwest for commercial operation in the 1988-1990 time frame is being evaluated. The Palo Verde units would be the "base plant" for the replicate units. If the feasibility is demonstrated, applications for construction permits will be filed in April, 1978, which would be within the time frame contemplated by the Commission's replication policy (WASH-1340). At this time the filing of such applications must be considered tentative since no commitment to participate in the replicate units has been made by any of the Palo Verde participants and no definitive schedule has been established for their construction and operation.

The names of the replicate units will be Palo Verde Units 4 and 5 if they are added to the Palo Verde site; if an alternate site is selected, the names will be related to the site ultimately selected.

At such time as our plans become more definite, either to proceed or not, we shall so advise you.

Very truly yours,

E. E. Van Brunt, Jr.
Vice President Construction Projects
