Docket: NRC-2018-0109

Draft Letter to the Nuclear Energy Institute Regarding the Clarification of Regulatory Paths for Lead Test Assemblies

Comment On: NRC-2018-0109-0002

Draft Letter to Nuclear Energy Institute Regarding Clarification of Regulatory Paths for Lead Test Assemblies

Document: NRC-2018-0109-DRAFT-0100

Comment on FR Doc # 2018-14121

Submitter Information

Name: Todd Millions

General Comment

I'm of an age to remember what a grade of sub standard idiots you were and are in these matters. Your colleagues in the frosty banana republic to the north of you are the same grade and always have being. My mother was on to them and you.

I have being watching the rad counts (only Gamma are available, the Beta emitter records have being "Scott Pruitt"). The Colorado spring cumulative s (with spike times) and prevailing westerly wind rose indicate that you have already converted a large hunk of the South West to a national sacrifice. Someones have gone very cheap on the kitty litter, which as we all know was predictably about as effective as the ice walls.

My skin in the game with everyone and thing else is of course that the zones spread and expand. This is easily demonstrated despite over 6 decades of Officially Convenient Lies (A branch of the State Department? In Canada it's a separate "ministry" called the PMO.) As well I live downwind of Hanford Wa-so I'm used to keeping an eye on these things.

I recall with amusement the snorts of alarmed derision and disbelief that very mage and competent Dam building engineers gave when the steel pans you were building to contain Hanford plutonium were designed and built. They lasted about as long as these fellows estimated if my childhood recall is accurate.

You don't need to give approval for these relaxed regs on fuel assembly "tests" and operation standards. You need to shut these abortions down Now (as in yesterday).

Thorium and Neutron beams? We all know though you Never mention it this still leaves the re emitting irradiated Iron (steel) scrap and Vital Soil Mineral. And does when circumzied Nazis' give test detonations to potential bomb customers of "clean warheads" which no testing is done for afterwards.

This prized market too- needs to be Killed (Yesterday) -So stop Fuqueing the dog and get on it-Before the meeting of the Solar Temple Club please.

As we both know-when those clowns get thru with the unacceptably sloppy handling of propane cylinders-The isreali "security" (blackmail-see:TEPCO) contractors who show up to hide the mess and take over the country that hires them-don't stop at the Nuclear plants.

Yes giving these more wiggle room is the thing you would want to do.

Should You? That was answered already-if you didn't see it, you are not qualified to have a say in these matters.

Kill this and Kill the tapeworm that feeds off it.

Todd Millions
