

The Nuclear Regulatory Commission (NRC) is sponsoring a webinar to discuss the status of the State of Wyoming's application to join the NRC's Agreement State Program. The NRC's Agreement State Program allows the NRC to discontinue and a State to assume regulatory authority for certain types of nuclear material. The State of Wyoming has applied to assume regulatory authority for uranium recovery activities within the State.

The webinar, "Update on the State of Wyoming Becoming an Agreement State" is scheduled for **Thursday April 26, 2018 at 3:00PM EDT (1:00 PM EMT)**. You may register to participate at

The presenter will address issues identified in recent phone calls with some Tribal Historic Preservation Offices, such as:

- Is there Tribal involvement in the State of Wyoming's proposed regulations?
- Would there be Federal involvement in projects on Federal or Tribal lands?
- What will NRC's role be in the future in ensuring that the State of Wyoming maintains the same safety standards for uranium recovery projects?

Additional topics will include 1) an update on Wyoming's progress in the Agreement application process over the last year; 2) the status and actions taken on the Programmatic Agreements and Memorandum of Agreements associated with some existing uranium recovery licenses; and 3) the publication of the draft NRC staff assessment of the Wyoming agreement application for public comment. The webinar will conclude with a question and answer session.
