**Subject:** Review of draft License Amendment No. 6 for the UNM AGN

Bob,

Attached is a draft copy of License Amendment No. 6 for the University of New Mexico (UNM) Research Reactor, including the draft license change page. I would request that you please review this draft, and confirm by response to this email whether the draft change page is correct and consistent with UNM's license amendment request dated October 20, 2017 (ADAMS Accession No. ML17303A074).

Thank you for your review. The NRC staff will place this email, the attachment, and your response confirming the above into NRC public ADAMS.

Regards,  
Ed
