Items of Interest
Week Ending July 13, 2018

Freedom of Information Act (FOIA) and Privacy Act (PA) Requests and Appeals Received
During the Period of July 9 – July 13, 2018, as submitted by requester

Any and all records, to include but not limited to reports, memos, photos, etc., related to the theft of two 5-gallon cans of low enriched uranium from the General Electric Plant in Wilmington, NC on Jan. 26, 1979.	NRC-2018-000631
Any and all documents associated with any reprimand issued to named individual during 2012/2013 contained in any of the agency's system of records to which named individual has had access during his employment with the agency.	NRC-2018-000633
Provisions of all material redacted from the Holtec Environmental Report on the HI-STORE CIS Facility ("CISF"), Rev. 1 ("ER"), pages 321-464.	NRC-2018-000634
Copy of named individual's Reactor Operator and Senior Reactor Operating Licenses.	NRC-2018-000635
The most recent revision of NRR Office Directive COM-106, Control of Task Interface Agreements; and all Biweekly TIA Status Reports dated January 1, 2016, and after.	NRC-2018-000636

Vogtle Electric Generating Plant Seismic Mitigating Strategies Assessment

On July 10, 2018, the staff issued its assessment (ADAMS Accession No. ML18180A314) of the Vogtle Electric Generating Plant, Units 1 and 2, seismic mitigating strategies assessment (MSA). This was the first Path 5 seismic MSA. Path 5 refers to plants for which the ground motion response spectrum has spectral ordinates greater than two times the safe shutdown earthquake anywhere in the 1 to 10 hertz frequency range. A Path 5 MSA is used to demonstrate that a seismic probabilistic risk assessment based alternate mitigating strategy (AMS) can be implemented considering the impacts of the reevaluated seismic hazard. The staff concluded that the MSA was performed consistent with the NRC-endorsed guidance and that the licensee demonstrated that the AMS, if appropriately implemented, is reasonably protected from reevaluated seismic hazard conditions.

Peach Bottom Subsequent License Renewal Application

On July 10, 2018, the Exelon Generation Corporation submitted its subsequent license renewal application requesting renewal of the operating licenses for the Peach Bottom Atomic Power Station, Units 2 and 3, for an additional 20 years. The operating licenses for Peach Bottom Atomic Power Station, Units 2 and 3, were initially renewed on May 7, 2003, with current expiration dates of August 8, 2033, and July 2, 2034, respectively. The NRC will review the application to determine if the application is sufficient and acceptable for docketing in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Sections 2.101, 51.45, 51.53(c), 54.19, 54.21, 54.22, and 54.23. If it is found to be sufficient, the staff will begin their more detailed review of the application.
