NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

November 15, 2018

MEMORANDUM TO: Vincent G. Gaddy, Chief  
Operations Branch  
Division of Reactor Safety  
Region IV

Kelly D. Clayton  
Operations Branch  
Division of Reactor Safety  
Region IV

FROM: Thomas H. Boyce, Chief **/RA/**  
Regulatory Guidance and Generic Issues Branch  
Division of Engineering  
Office of Nuclear Regulatory Research

SUBJECT: ACCEPTANCE REVIEW OF PRE-GI-020, PROPOSED  
GENERIC ISSUE ON INADEQUATE PROCEDURES TO  
ADDRESS ANTICIPATED OPERATIONAL OCCURRENCES

The purpose of this memorandum is to inform you of the results of acceptance review performed by the Generic Issue (GI) Program staff on the subject proposed GI that you submitted on January 4, 2018. Based on its review, the GI staff found that the proposed GI did not meet all of the screening criteria for the GI process specified in Management Directive 6.4, "Generic Issues Program." Specifically, the proposed issue did not meet Criterion 1, the issue affects public health and safety, the common defense and security, or the environment, because the increase in risk from the scenarios described in the proposed GI falls below the threshold necessary to continue in the GI process. Since the proposed issue did not meet all the screening criteria, the proposed issue will exit the GI process.

The following enclosures support the GI Program staff's conclusion:

- Enclosure 1 summarizes the GI Program staff's review against the screening criteria.
- Enclosure 2 provides supporting information for the issue.
- Enclosure 3 provides the GI Program staff's evaluation of the issue.

The GI staff would like to thank you for submitting this proposed issue into the GI program for consideration. Please direct any questions you may have to me or the point of contact listed on this memorandum.
