Dear NRC Staff,

As a TVA customer, I am very concerned about TVA's early site permit application for small modular reactors at the Clinch River Site in Tennessee. TVA doesn't need more supply. The NRC should evaluate the costs of SMRs in comparison to other energy choices, such as wind and solar, including energy efficiency and conservation.

A comparison of the impacts on our water resources, including water quality and water supply of both surface and groundwater, should also be done by the NRC for SMRs and these other energy choices.

Last, I request that the NRC reject TVA's effort to reduce the emergency planning zone from 10-miles to 2 miles or less. Should an accident ever occur at the Clinch River Site, the NRC should provide the public with a detailed analysis of how many members of the public could be harmed if these changes in the safety radius are implemented. The safety of our communities should be the NRC's top concern, not the ability for utilities to pursue an experimental technology that is not needed.

Please rethink our need for this dangerous technology. Implementation will be much more destructive to our beautiful environment here in east Tennessee, than can possibly be made up for by this dirty energy.

Thank you.

Sincerely,  
Carol Rasmussen  
383 Hill Rd Harrogate, TN 37752-5849
