SUBJECT
License Renewal Request - Additional Information Required.

SUMMARY
On June 26, 2018 the license reviewer contacted Mr. Frederick Hommel regarding a discrepancy between the nuclear gauge models listed in the renewal application and the nuclear gauge models currently listed in item 9.A. of NRC License No. 21-32044-01. During the conversation Mr. Hommel confirmed that the Thermo Gamma Metrics CB-GN device listed in the renewal application is the same device as the Thermo Gamma Metrics CB-S device currently listed on the license. There has been no change to the sealed sources associated with the gauge, or to the physical gauge itself other than a recent electronics upgrade performed by the vendor.

The reviewers understanding is that this device is a Thermo Gamma Metrics Model CB-S device. Further, the reviewer understands that no changes are requested regarding the sealed source and possession limits currently listed in Items 7.A. and 8.A. on the license.
