## General Comment

There is a reason for regulations. Corporations cannot be trusted to act in the best interest of the public. All too often, they act only on behalf of the bottom line, corporate executive pay and shareholder interests. Regulations are necessary to protect the health, safety and welfare of all citizens. Do NOT allow nuclear power plant owners to experiment without oversight! The danger that these power plants present is irreversible and could kill thousands (if not millions) and devastate large areas, rendering them uninhabitable for centuries. MORE regulation is called for - not less.
