SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 50-21252-01

Dear Mr. Barrick,

By letter dated May 31, 2018, George C. Loyd, Risk Manager, Corporate Treasurer, informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated May 31, 2018, stated that radioactive material had been transferred to manufacturers, Troxler Electronic Laboratories and Seaman Nuclear Corporation and to Alaska Testlab, LLC, a NRC licensee.

The supporting documentation to the NRC Form 314 also provided copies of the latest leak test results and manufacturer transfer receipt documentation. The leak test results document that there was no evidence of leakage of radioactive material from the sealed sources. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been transferred to Alaska Testlab, LLC, and the radioactive material remains used/stored at the facility located at 4041 B Street, Anchorage, Alaska 99503 that was listed under DOWL's previous NRC License. Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 14 to License No. 50-21252-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at (817) 200-1286 if you have questions or require clarification on any of the information stated above.

Sincerely,

***/RA/***
