General Comment

I totally disagree with the NRC positions on Technical Specification 4.2.1, exemptions for lead test assemblies (LTAs), and the assertion that LTAs of new materials that have never before been put in a reactor can be done without prior NRC approval under 10 CFR 50.59. The NRC should hold a meeting to discuss the proposed resolution of comments including the non-concurrence by Mr. Chernoff and another NRC employee that submitted a differing professional opinion (DPO).
