NRC-2016-0119

Dear NRC Staff,

As a TVA customer, I am worried about TVA's application for small modular reactors (SMRs) at the Clinch River Site in Tennessee. Hasn't TVA caused enough suffering (witness the coal ash spill and its disastrous cleanup).

I recently heard something about SMRs through the Alliance for Nuclear Accountability. I learned that the term small here does not apply to environmental effects, which will be big, unwanted and unnecessary.

Just because a site is abandoned doesn't mean it needs to be filled by a project where proof of safety and necessity are lacking.

I am looking for the NRC to help protect us by carefully analyzing those factors while considering a reply to TVA's permit application.

Thank you.

Sincerely,  
Betty Coleman
