The NRC must align with the American citizens and the environs which are placed directly in real harm by this scheme. Ultimately this is about income for private corporations, especially when they begin taking imports from around the world. In my view a reckless, costly and dangerous plan without oversight or enforcement Stop protecting and defending the known hazards demanded by industry and private profiteers.

After decades you still can/will not even contain or remedy Hanford, how on Earth do you think this will end up? Make sure to have lots of "kitty litter" on hand! Isn't that how the last nearby disaster in New Mexico was contained?

Please do not risk the American landscape and all citizens with this short sighted plan.

Thank You -

Carol Jagiello
