Subject: For Your Info - EA and FONSI for Oyster Creek EP Exemption

Importance: High

Paul and Veena,

In the next couple of weeks, the U.S. Nuclear Regulatory Commission (NRC) is considering issuance of exemptions in response to a request from Exelon Generation Company, LLC (Exelon or the licensee) that would permit the licensee to reduce its emergency planning (EP) activities at the Oyster Creek Nuclear Generating Station (Oyster Creek). The licensee is seeking exemptions that would eliminate the requirements for the licensee to maintain offsite radiological emergency plans and reduce some of the onsite EP activities based on the reduced risks at Oyster Creek, which will be permanently shut down and defueled. However, requirements for certain onsite capabilities to communicate and coordinate with offsite response authorities would be retained. In addition, offsite EP provisions would still exist through State and local government use of a comprehensive emergency management plan process in accordance with the Federal Emergency Management Agency's (FEMA's) Comprehensive Preparedness Guide (CPG) 101, "Developing and Maintaining Emergency Operations Plans." The NRC staff will be issuing a final Environmental Assessment (EA) and final Finding of No Significant Impact (FONSI) associated with the proposed exemptions.

Thanks.
John
