General Comment

"Look, having nuclear - my uncle was a great professor and scientist and engineer, Dr. John Trump at MIT; good genes, very good genes, OK, very smart, the Wharton School of Finance, very good, very smart - you know, if you're a conservative Republican, if I were a liberal, if, like, OK, if I ran as a liberal Democrat, they would say I'm one of the smartest people anywhere in the world - its true! - but when you're a conservative Republican they try - oh, do they do a number - thats why I always start off: Went to Wharton, was a good student, went there, went there, did this, built a fortune - you know I have to give my like credentials all the time, because were a little disadvantaged - but you look at the nuclear deal, the thing that really bothers me - it would have been so easy, and its not as important as these lives are (nuclear is powerful; my uncle explained that to me many, many years ago, the power and that was 35 years ago; he would explain the power of what's going to happen and he was right - who would have thought?)" -- President Tiny Hands
