**Declaration of Gina Trujillo, Director of Membership, Natural Resources Defense Council**

---

I, Gina Trujillo, declare as follows:

1. I am the director of membership at the Natural Resources Defense Council (“NRDC”). I have been the director of membership since January 1, 2015. I have worked in the membership department of NRDC for more than 24 years
  
2. My duties include supervising the preparation of materials that NRDC distributes to members and prospective members. Those materials describe NRDC and identify its mission.
  
3. NRDC is a membership organization incorporated under the laws of the State of New York. It is recognized as a not-for-profit corporation under section 501(c)(3) of the United States Internal Revenue Code.
  
4. NRDC currently has approximately 384,000 members. There are NRDC members residing in each of the fifty United States and in the District of Columbia. NRDC has 15,324

members in Florida. There are at least 1,746 members living within 50 miles of the Turkey Point Nuclear Generating Stations and at least 103 members live within 10 miles of the facility.

5. NRDC's mission statement declares that "The Natural Resources Defense Council's purpose is to safeguard the Earth: its people, its plants and animals, and the natural systems on which all life depends." Furthermore, NRDC "strive[s] to protect nature in ways that advance the long-term welfare of present and future generations," and "work[s] to foster the fundamental right of all people to have a voice in decisions that affect their environment."

6. Since its inception in 1970, NRDC has, as one of its organizational goals, sought to improve the environmental, health, and safety conditions at the nuclear facilities operated by the Department of Energy and the civil nuclear facilities licensed by the Nuclear Regulatory Commission and their predecessor agencies. To that end, NRDC utilizes its institutional resources (such as its capacities for legislative advocacy, public outreach and education, and litigation) to minimize the risks that nuclear facilities pose to its members and to the general public.

I declare under penalty of perjury that the foregoing is true and correct, to the best of my knowledge, information, and belief.
