CPPR No. 61
DPR No. 58

February 14, 1975

Mr. E. L. Jordan, Senior Reactor Inspector
Operations Branch
Directorate of Regulatory Operations
U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Jordan:

This letter confirms our telephone conversation of February 13 regarding our request for an extension of time for submittal of a follow-up report on the violation which we reported to you on February 7, 1975. This violation involved the release of water from the waste evaporator condensate tank without having carried out a sampling step required by the Environmental Technical Specifications (Section 2.4.2b). Our investigation of this violation has led to a discovery that in the water releases which we have made to date, the quantity of boric acid exceeds the concentration limits set by Table 2.2-1 of our Environmental Technical Specifications. In addition to this, we are required in Table 4.2-1 of the Environmental Technical Specifications to carry out a lake water sampling program, "Every 4 weeks or 24 hours after a batch release." We are sampling every 4 weeks, but if the Specification means each batch release, we have not been carrying out this step. We will seek clarification of this requirement from the Nuclear Regulatory Commission staff.

To determine the reasons for these violations and the corrective actions more time will be required, and we therefore ask for an extension of the time required to submit our report to you. As a course of our telephone conversation, you agreed that submission of this report on February 21, 1975 would be acceptable.

Very truly yours,

A handwritten signature in dark ink, appearing to read "R. S. Hunter".

R. S. Hunter
