799 Roosevelt Road  
Glen Ellyn, IL 60137

Operating License DPR-58  
Docket No. 50-315

Dear Mr. Keppler:

This is to confirm our telephone call to Mr. K.R. Baker, NRC Region III, at 1432 hours on October 29, 1976. During that conversation we reported that an abnormal environmental occurrence had taken place October 29, 1976.

This occurrence was the failure to monitor the circulating water total chlorine residual during the chlorination cycle in violation of Appendix "B" Technical Specifications Section 2.2.1.3.

The chlorination program is presently set to chlorinate automatically at 1000 and 2200 hours each day and, due to the Chemical Technician being unaware of the time, no monitoring was performed at the 1000 hour period.

We are continuing our investigation and will submit the required report within seven days as required by Appendix "B" Technical Specifications Section 5.4.2.1.

Sincerely,

for R.W. Jurgensen  
Plant Manager

Gentlemen:

We have rescheduled the corporate level meeting at your New York office which was described in my letter to you dated June 4, 1976, from July 7, 1976, to July 20, 1976.

We regret any inconvenience which may have resulted from this change.

Sincerely yours,

James G. Keppler

Dear Dr. Volgenau:

In your April 15, 1977 letter to me, you requested our cooperation in posting the enclosed notice to employees concerning the NRC's willingness to accept collect telephone calls from nuclear industry workers.

I am pleased to inform you that we have posted copies of your notice in conspicuous locations at the Donald C. Cook Nuclear Plant. The locations selected are such that both our own operating staff and the contractor's construction workers may observe the notice on their way to and from their work locations.

Very truly yours,

*John E. Dolan*

 ATTN: Mr. R. W. Jurgensen,  
 Plant Manager  
 Donald C. Cook Nuclear Plant  
 P. O. Box 458  
 Bridgman, Michigan 49106

Gentlemen:

This is in reply to your letter dated March 22, 1977, and subsequent letter from Mr. R. E. Armstrong, dated April 29, 1977 relative to training personnel for licensing on D. C. Cook Unit 2. Your letter requested approval of the training program to be utilized in training personnel licensed on Unit 1 on the differences in Unit 2.

Based on our review of the information contained in your letters, we have determined that individuals licensed on Unit 1 who successfully complete the Differences Training Program will be eligible to receive licenses for Unit 2 without NRC administered examination. Upon meeting the other requirements of Section 55.11, their licenses will be amended, at the appropriate time, to include operation of Unit 2.

I hope this information will be of use to you.

Sincerely,  
 J. F. COLLINS  
 P. F. COLLINS

May 4, 1977

Mr. J. G. Keppler, Regional Director  
Office of Inspection and Enforcement  
United States Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, IL 60137

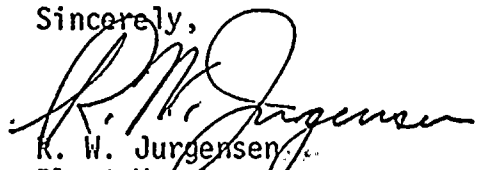

Operating License DPR-58  
Docket No. 50-315

Dear Mr. Keppler:

With reference to my letter to you of April 28, 1977, in which I reported the possible loss of an unirradiated non-radioactive incore movable detector, I am pleased to report that the detector in its wooden shipping container has been located. It was in the controlled area of the auxiliary building.

To prevent recurrence of this type of incident, our Special Nuclear Material Accountability Procedure; PMP 4040 SNM.001, has been revised to give the Nuclear Materials Manager direct responsibility for preparation of the necessary shipping documents and ensuring the detector is shipped. Also, in addition to the normal shipping documents, an NRC/ERDA-741 form shall be completed by the Nuclear Materials Manager and mailed to the company receiving the detector the same day the detector leaves the plant site. By use of the 741 form for shipment, we will be informed by the receiving company when the detector arrives at their facility.

Sincerely,

  
R. W. Jurgensen  
Plant Manager

Docket No. 50-315

Indiana & Michigan Power Company  
 ATTN: Mr. R. E. Armstrong,  
 Training Coordinator  
 Donald C. Cook Nuclear Plant  
 P. O. Box 458  
 Bridgman, Michigan 49106

Gentlemen:

This is in reply to your letter dated April 1, 1977. Your letter requested NRC waive the requirement for second year examinations for those individuals who received their senior operator licenses in February 1977. Rather than administer a second examination to these men, you requested that their "final examinations" prior to licensing be used for determining mandatory lecture attendance pursuant to the requirements of your requalification program.

Based on our review of the information contained in your letter, we have determined that the operator requalification examination may be waived and that the "final examinations" may be used as a basis for determining mandatory lecture attendance. The individuals involved are Messrs. Boone, Freehling, Cooledge, Gallagher, Hall, Runser, Skinner, Zimmerman and Schwerha.

Sincerely,

Bridgman, Michigan 49106

Gentlemen:

We have received and reviewed the ten operator and nine senior operator applications for the D. C. Cook Nuclear Plant, Unit No. 1. We find the applications to be in order, with the following exceptions:

The applications for Messrs. Randolph, Tollas, Strasser, Craig, Foss, Lewis, Vonk and Perrine do not contain the certifications from the Combustion Engineering Training School. Prior to the administration of the operating tests, these certifications must be forwarded to this office. Also, Mr. Skinner's application indicated that his Certificate of Medical History has been forwarded to this office. To date, we have not received the Certificate.

The examinations have been assigned to Mr. A. P. Vinther and Mr. T. E. Edwards. The examinations are scheduled for the week of January 17, 1977.

Sincerely,
