Subject: State Consultation: Request for Comments on Amendment to Watts Bar Unit 1 Operating License Related to Revising Technical Specification Surveillance Requirements (EPID L-2018-LLA-0187)
Attachments: FRN (83 FR 32912) 2018-15100.pdf
Expires: Saturday, October 06, 2018 12:00 AM

Mr. Crosslin,

I am Natreon Jordan and I currently serve as the NRC Project Manager for the Watts Bar Nuclear Plant. This email is to inform you that the NRC is finalizing a license amendment for Watts Bar Nuclear Plant, Unit 1. We are notifying you of the proposed issuance in accordance with Title 10 of the Code of Federal Regulations (10 CFR) Section 50.91(b), 10 CFR 50.91(b)(3) and (b)(4). The amendment revises Technical Specification (TS) Surveillance Requirement (SR) 3.0.2 and Table SR 3.0.2-1 to permit the extension of the Surveillance Frequencies for SRs 3.3.1.5, 3.3.2.2, and 3.3.6.2. The Surveillance Frequency extension limits for these SRs expire on October 1, 2018 (as listed in Table SR 3.0.2-1) or when the unit enters MODE 5, whichever occurs first.

The licensee's application dated July 8, 2018, and supplements dated July 24 and July 30, 2018, are available in ADAMS under Accession Nos. ML18189A001, ML18206A416, and ML18211A393, respectively.

The amendment was noticed in the Federal Register on July 16, 2018 (83 FR 32912). See the attachment to this email. The public comment period expires on August 15, 2018. No public comments have been received to date. NRC plans to issue this amendment on August 16, 2018, per the licensee's request, as specified in their July 8, 2018, submittal.

Please provide any comments regarding this license amendment to me by August 13, 2018. Please contact me by e-mail or at 301-415-7410 if you have any questions or comments.

Sincerely,

Natreon (Nate) Jordan
