Dear Mr. Kinard:

On July 26, 2018, the U.S. Nuclear Regulatory Commission (NRC) completed a security inspection at your McGuire Nuclear Station, Units 1 and 2, and discussed the results of this inspection with Mr. S. Snider, and other members of the McGuire Nuclear Station staff. The results of this inspection are documented in the enclosed report.

The NRC inspectors documented a finding of very low security significance (Green) in this report. This finding involved a violation of NRC requirements. The NRC is treating this violation as a non-cited violation (NCV) consistent with Section 2.3.2.a of the Enforcement Policy.

If you contest the violation or the significance of the NCV, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555-0001; with copies to the Regional Administrator, Region II; the Director, Office of Enforcement; the Director, Office of Nuclear Security and Incident Response; and the NRC resident inspector at the McGuire Nuclear Station.

A cross-cutting aspect was assigned to the finding in the area of Human Performance, Avoid Complacency. Specifically, because McGuire Nuclear Station failed to recognize and plan for the possibility of mistakes, latent issues, and inherent risk, even while expecting successful outcomes (H.12).

If you disagree with the cross-cutting aspect assignment in this report, you should provide a response within 30 days of the date of this inspection report, with the basis for your
