Subject: [External_Sender] Tetra Tech EC Confirmatory Order - Completion of Requirement 1

Jim and Ray,

The Confirmatory Order dated October 11, 2016, Item 1, required TtEC to discuss the facts and lessons learned from the event that gave rise to the Confirmatory Order during a quarterly call. Item 1a required that TtEC emphasize the importance of employees not engaging in willful activities in violation of NRC rules and regulations, and allowed TtEC employees to ask follow-up questions and provide feedback.

I held on All Hands Call on November 9, 2016. I had a total of 5 slides dedicated to this topic, including a discussion of the facts leading to the NOV and Confirmatory Order, Lessons Learned from the event, and the opportunity to ask questions.

Due to the confidential nature of the All Hands Call information, I am not attaching it to this submittal. However, I would be happy to make it available for your inspection should you visit a Tetra Tech office.

I believe we have successfully completed Item 1 of the Confirmatory Order, and request your concurrence.

Thanks,
Andy
