RE: Homestake Mining Company's (Homestake) Water Use Report Letter of Information No. 687 for July 2018

Dear Mr. Burrus,

This information is relative to files 1605 and B-28 for July 2018.

On July 30, 2018 the meter readings for Deep Well #1 (B-28-S), Deep Well #2 (B-28-S-1), well 943 (B-28-S-329), and well 951R (B-28-POD1340) were 541,737,984, 563,668,000, 3,357,476 and 848,017,000 gallons, respectively. Only well Deep Well #2 had water usage this month. Monthly meter readings and volumes of water usage are presented in Table 2.

Metered gallons of 42,057,355 [total water injected] or 129.1 acre-feet (see next to last column in Table 1) were injected into wells in the San Mateo alluvial aquifer and the Upper and Middle Chinle aquifers, all located in Sections 26, 27, 28, 34 and 35 T12N; R10W and Section 3 T11N, R10W. As stated in Permit No. 1605 and B-28 Temp, Homestake requests return flow credits for water that is returned to underground aquifers. A portion of this injected water was shallow aquifer water treated by reverse osmosis and zeolite.

A monthly total of [industrial diversion] 50,287,209 metered gallons or 154.3 acre-feet (see tenth column in Table 1) of water were pumped from Homestake's production wells, of which 42,057,355 metered gallons [total water injected], were returned to the Bluewater underground water basin. Metered water used for industrial purposes was [industrial consumption] 8,229,254 gallons or 25.25 acre feet for July.

Thank you very much for your time and attention, if you have any questions regarding the foregoing information, I can be reached at 505-290-2187.

Respectfully,

Thomas Wohlford, Hydrogeologist, CPG
Closure Manager
