Director of Nuclear Reactor Regulation
 Attention: Mr. Victor Stello, Director
 Division of Operating Reactors
 U. S. Nuclear Regulatory Commission
 Washington, D.C. 20555

Dear Mr. Stello:

Re: Turkey Point Units 3 and 4 and
 St. Lucie Unit 1, Docket Nos. 50-250,
 250-251 and 50-335 - Proposed Amendment
 to Facility Operating Licenses DPR-31,
 DPR-41 and DPR-67

In accordance with 10 CFR 50.30, Florida Power & Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Appendix A of Facility Operating Licenses, DPR-31, DPR-41, and DPR-67.

The proposed amendment is described below and shown on the accompanying Technical Specification page bearing the date of this letter in the lower right-hand corner.

Page 6-2

Figure 6.2-1 is revised to reflect recent minor changes in our offsite organization. Two positions have new titles (Vice President-Nuclear and General Engineering and Manager-Licensing and Environmental Planning). One position has been deleted (Vice President-Environmental Planning & Research).

The proposed amendment has been reviewed by the St. Lucie Facility Review Group, the Turkey Point Plant Nuclear Safety Committee, and the Florida Power & Light Company Nuclear Review Board. They have concluded that it does not involve an unreviewed safety question. A safety evaluation is attached.

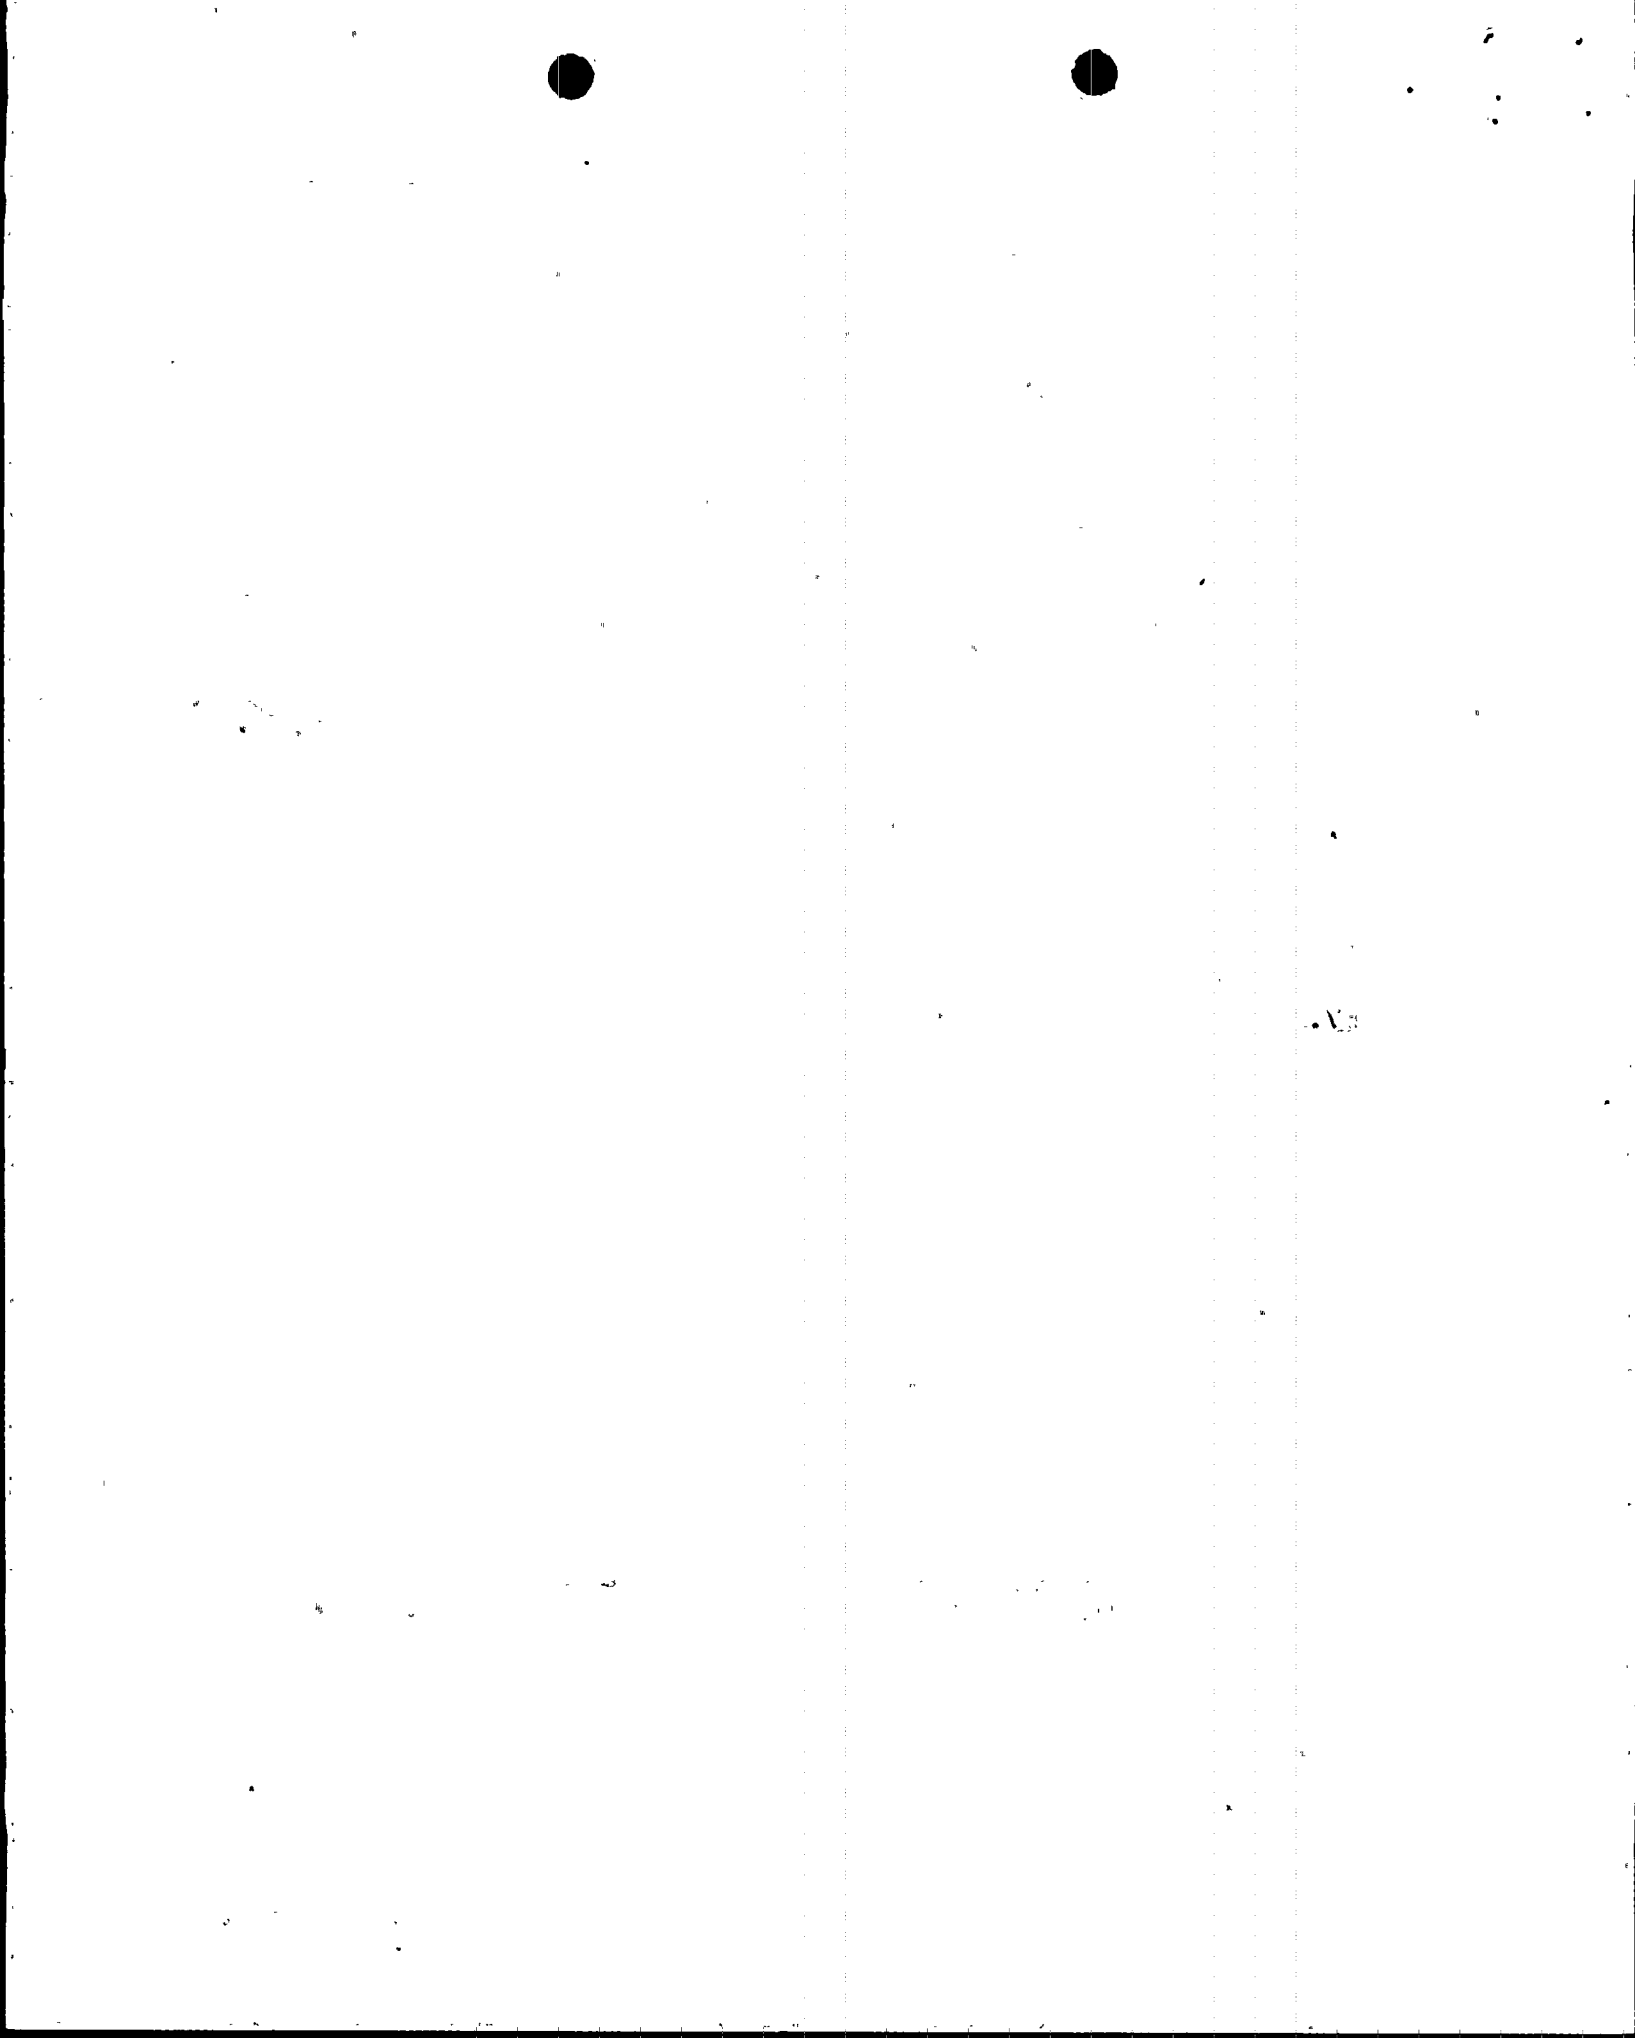

Very truly yours,

Robert E. Uhrig
 Robert E. Uhrig

SAFETY EVALUATION

Re: Turkey Point Units 3 and 4 and
St. Lucie Unit 1, Docket Nos. 50-250,
250-251 and 50-335 - Proposed Amendment
to Facility Operating Licenses DPR-31,
DPR-41 and DPR-67

I. Introduction

This safety evaluation supports proposed changes to the organization chart describing the offsite organization for facility management and technical support.

II. Description

Figure 6.2-1 on page 6-2 should be changed to reflect minor changes in the Florida Power & Light Company (FPL) offsite organization for management and support of nuclear facilities. Two positions have new titles and one position has been deleted as described in the cover letter.

III. Evaluation

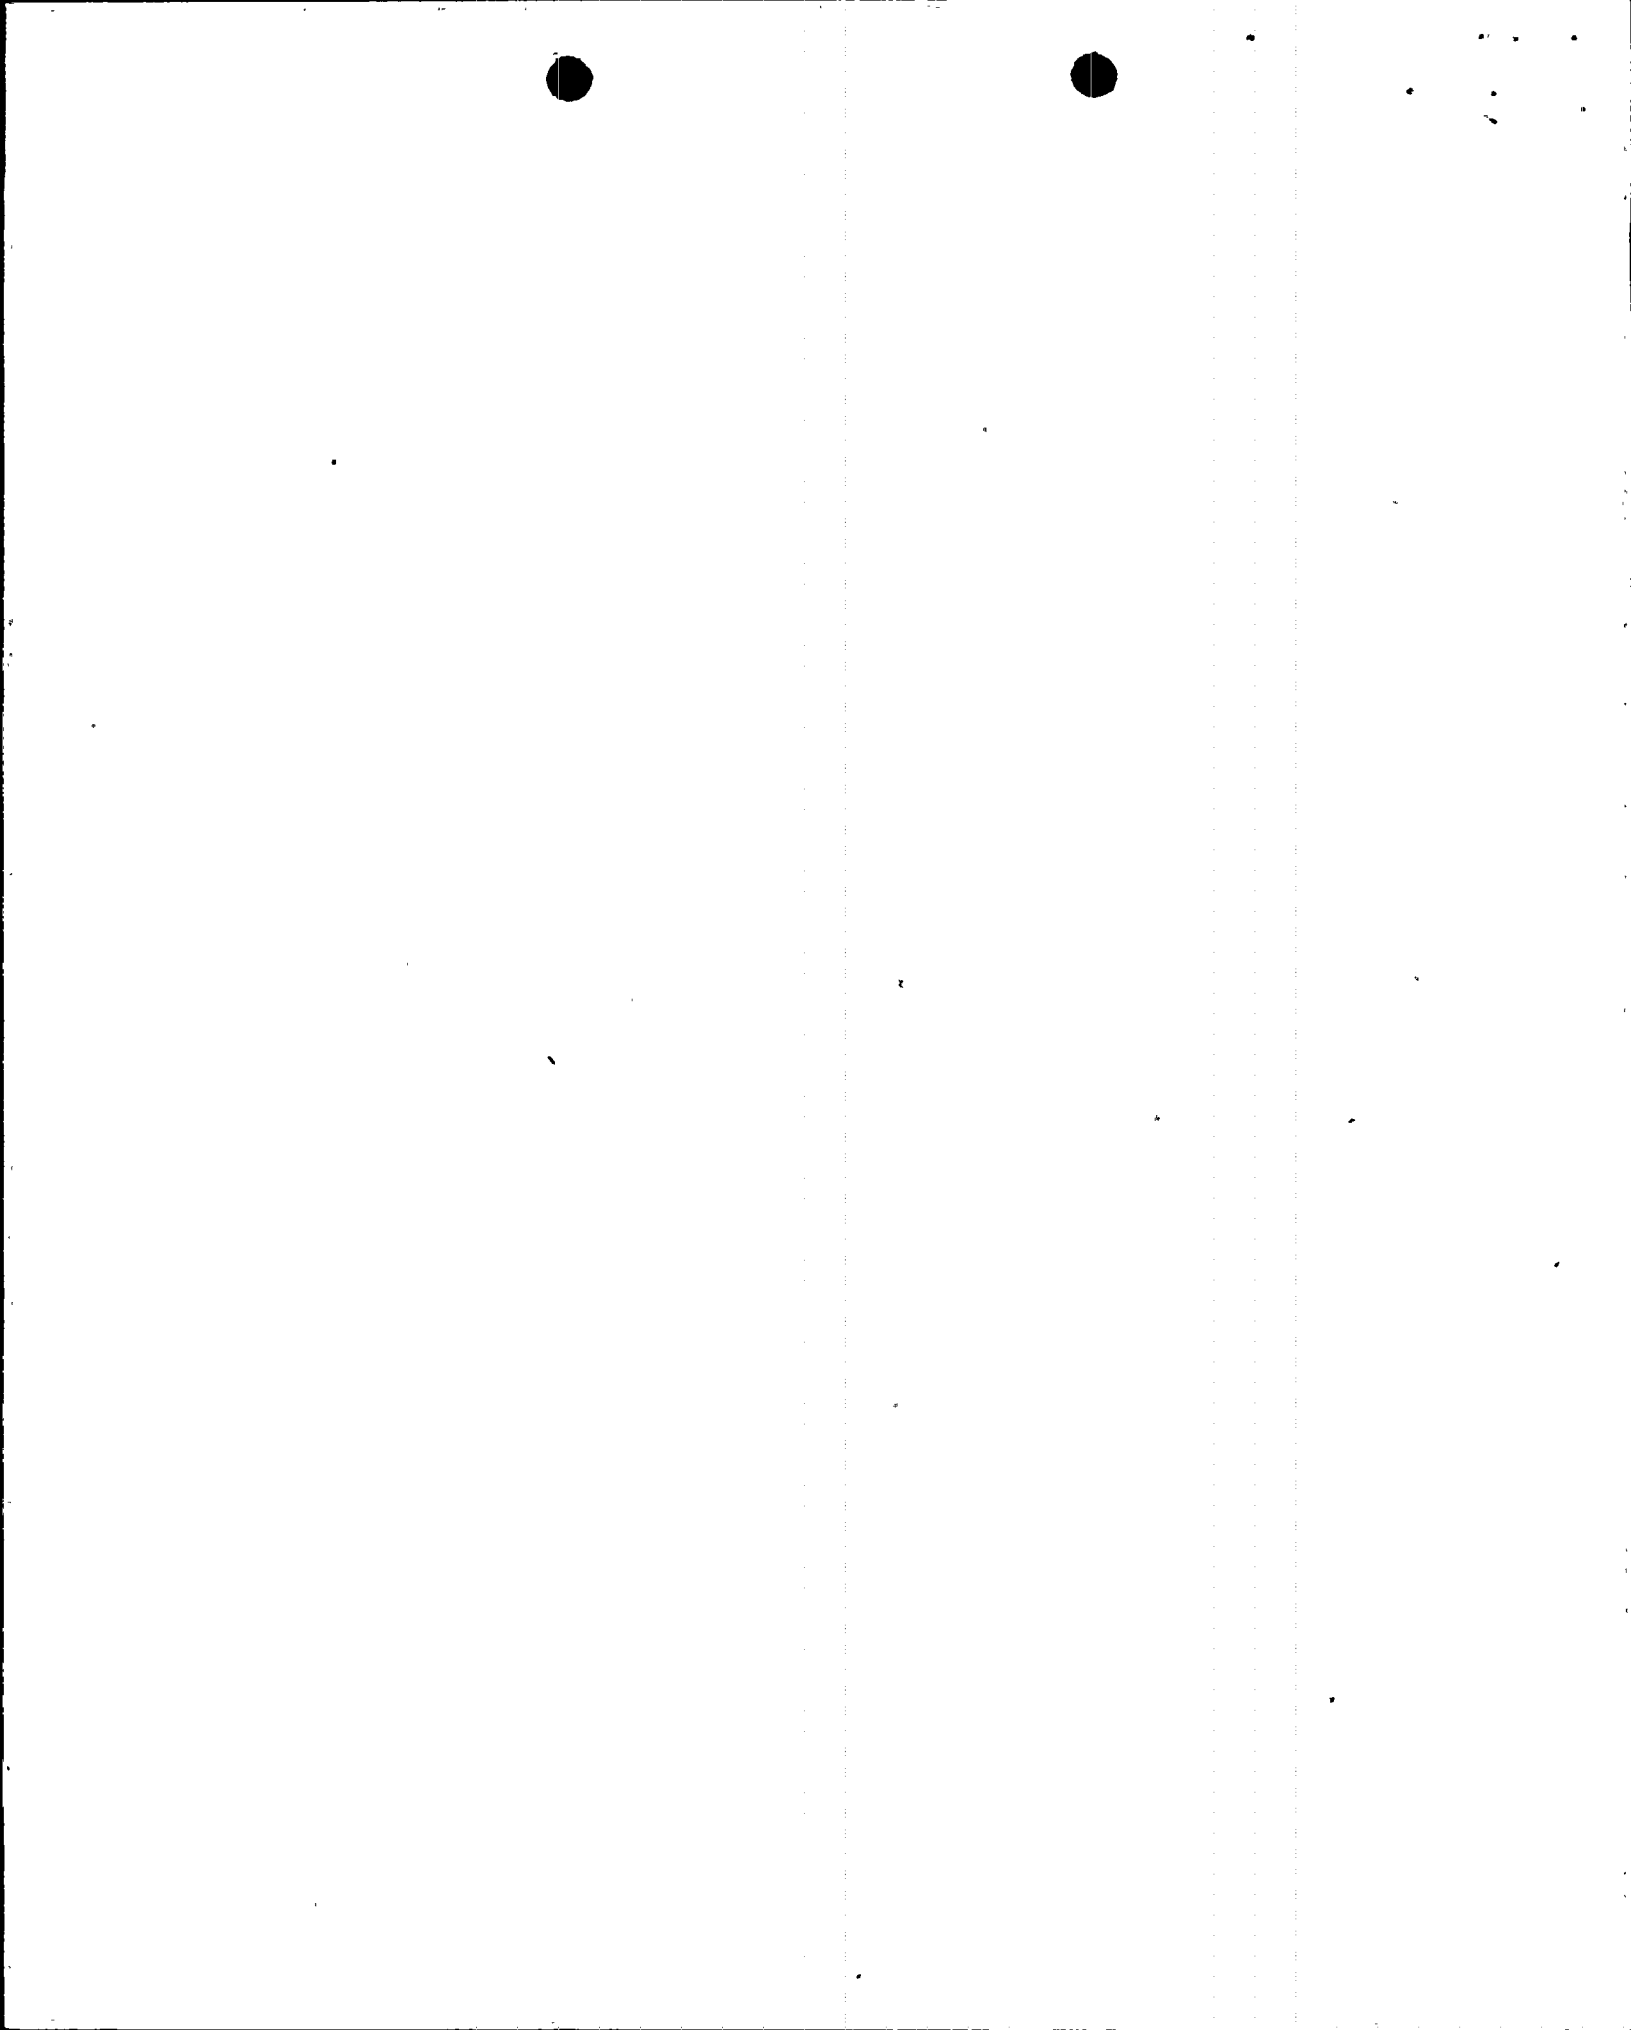

The proposed amendment is administrative and does not involve the modification of any equipment or procedures. It does not involve a significant change in the management or support of FPL nuclear facilities; the responsibilities for research and environmental planning have been transferred to different people, but these responsibilities remain basically the same.

Since the proposed amendment does not involve hardware changes, procedure changes, or significant administrative changes:

- i) the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously analyzed in the safety analysis report is not increased,
- ii) the possibility for an accident or malfunction of a different type than any evaluated previously in the safety analysis report is not created, and
- iii) the margin of safety as defined in the basis for any technical specification is not reduced.

IV. Conclusions

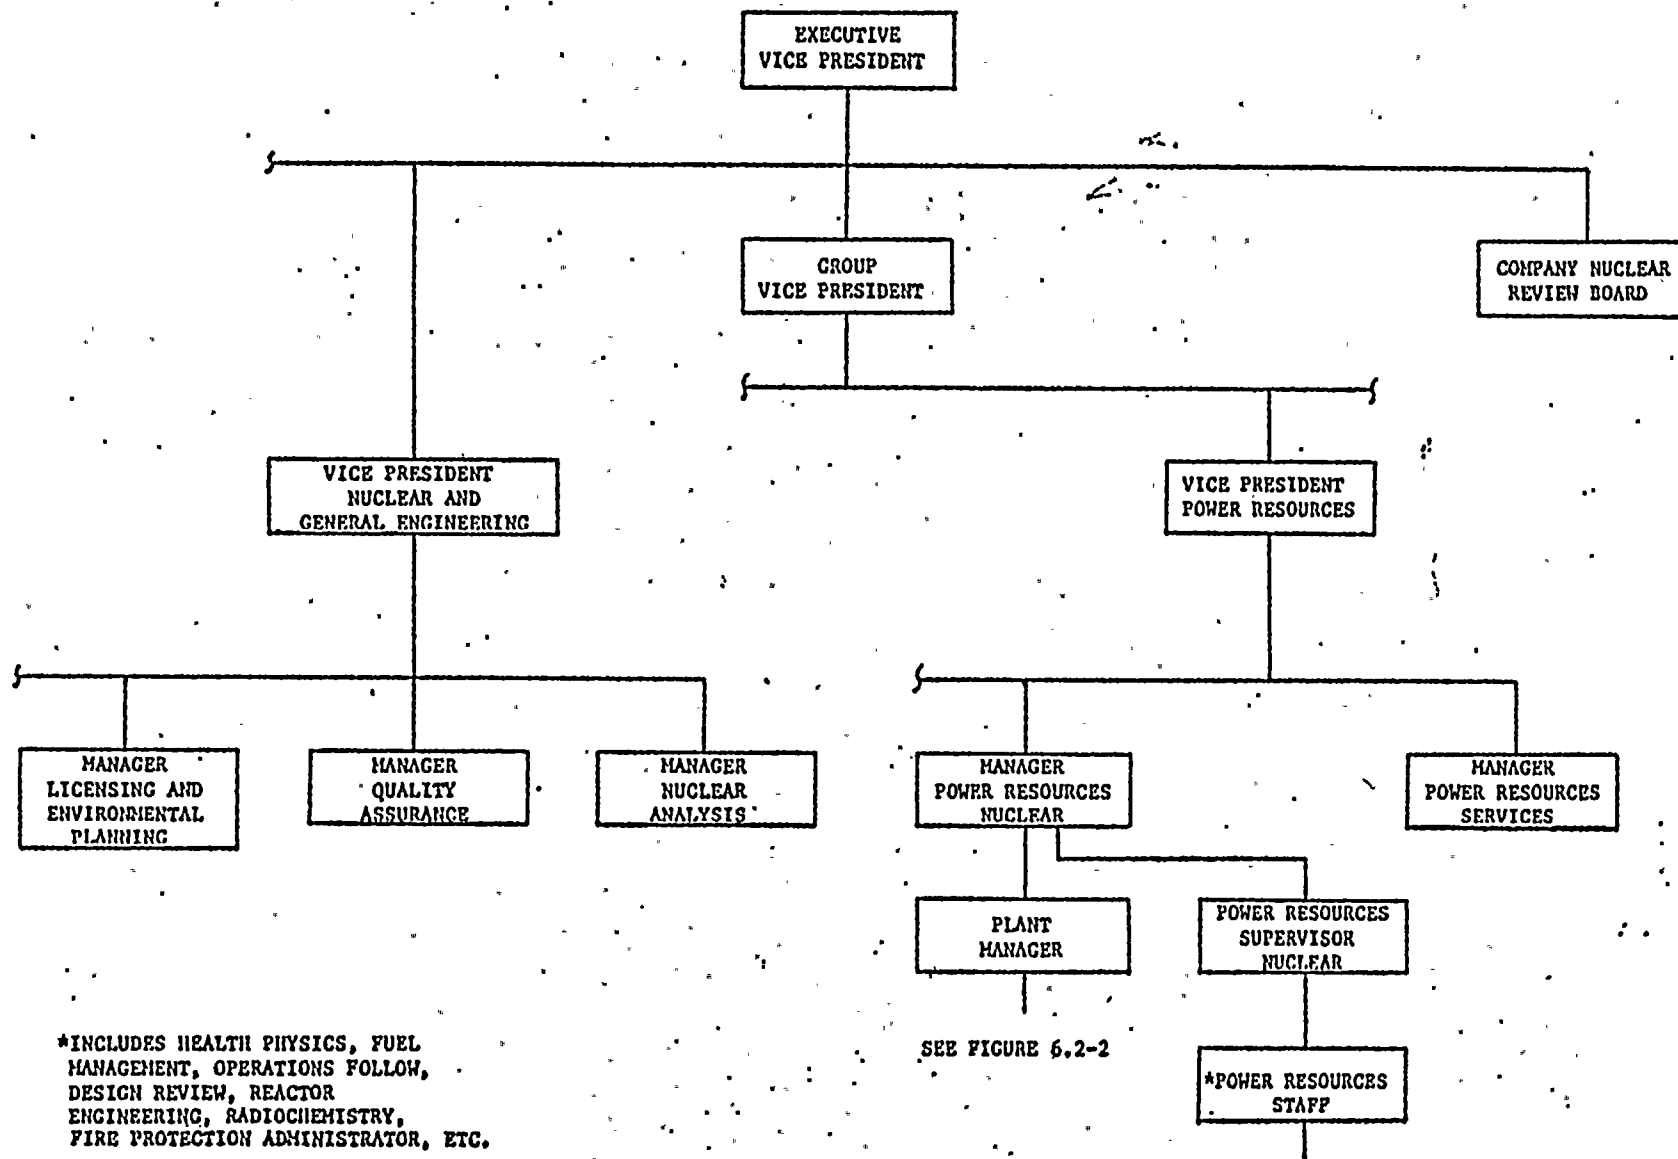

Based on these considerations, (1) the proposed amendment does not involve an unreviewed safety question, (2) there is

reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (3) such activities will be conducted in compliance with the Commission's regulations and the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

/

*INCLUDES HEALTH PHYSICS, FUEL MANAGEMENT, OPERATIONS FOLLOW, DESIGN REVIEW, REACTOR ENGINEERING, RADIOCHEMISTRY, FIRE PROTECTION ADMINISTRATOR, ETC.
