Director of Nuclear Reactor Regulation  
Attention: Mr. Victor Stello, Director  
Division of Operating Reactors  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Stello:

Re: Turkey Point Unit 3  
Docket No. 50-250  
Proposed Amendment to Facility  
Operating License DPR-31

In accordance with 10 CFR 50.30, Florida Power & Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Facility Operating License DPR-31.

Section 3.E of License DPR-31 requires that Unit 3 be shutdown within 6 equivalent months of operation from January 14, 1977 (approximately July 16, 1977) for the purpose of inspecting steam generators. We would like to continue operating Unit 3 until August 16, 1977 in order to avoid concurrent shutdown of Units 3 and 4.

The need for this request has been caused by our extension of the Unit 4 refueling outage for from 3 to 5 weeks beyond the scheduled completion date of July 9, 1977. As described in the preceding paragraph, Unit 3 is required to shutdown for steam generator inspections during this same time period. However, because the Unit 3 steam generators have experienced no perceptible tube leakage since the beginning of Cycle 4 operation, it is reasonable to expect that Unit 3 can continue to operate beyond July 16, 1977 without adverse effect on the public health and safety.

As a result of the extended Unit 4 refueling outage, we request the following amendment to paragraph 3.E of the Turkey Point Unit 3 Facility Operating License:

771930377

Faint, illegible handwritten text in the upper middle section.

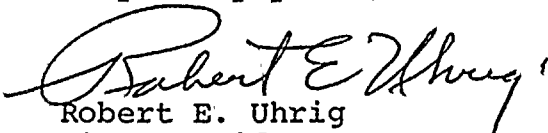

A small, short, diagonal handwritten mark or scribble.

E. Steam Generator Inspections

In order to perform an inspection of the steam generators, Unit No. 3 shall be brought to the cold shutdown condition no later than August 16, 1977. Nuclear Regulatory Commission approval shall be obtained before resuming power operation following this inspection. Unit No. 3 operation until August 16, 1977 is authorized provided that further information and evaluations required in connection with continued operation of Unit No. 4, as a result of Amendment No. 20 to Facility Operating License DPR-41, justify continued operation of Unit No. 3 for the full period authorized by this paragraph 3.E.

The proposed amendment has been reviewed by the Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board. They have concluded that continued operation of Unit 3 for the time period requested will not adversely affect the public health and safety.

Very truly yours,

  
Robert E. Uhrig  
Vice President

REU/MAS/cpc
