UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-251

FLORIDA POWER AND LIGHT COMPANY

NOTICE OF GRANTING OF RELIEF FROM ASME SECTION XI  
INSERVICE INSPECTION (TESTING) REQUIREMENTS

The U. S. Nuclear Regulatory Commission (the Commission) has granted interim relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Florida Power and Light Company, pending the Commission's completion of its detailed analysis of FPL's application for permanent relief. The relief relates to the inservice inspection (testing) program for the Turkey Point Generating Station Unit No. 4 (the facility) located in Dade County, Florida. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The relief consists of excepting certain valves and pumps from being exercised or tested due to their design and their physical location, arrangements, alignment and orientation in the system or pumps and valves whose access may be restricted due to high radiation areas.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief. Prior public notice of this action was not required since the granting of this relief from ASME Code requirements does not involve a significant hazards consideration.

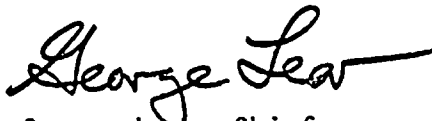

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR s1.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the request for relief dated February 25, 1977, (2) the Commission's letter to the licensee dated September 7, 1977.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida. A copy of item (2) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 7 day of September 1977.

FOR THE NUCLEAR REGULATORY COMMISSION

George Lear, Chief  
Operating Reactors Branch #3  
Division of Operating Reactors
