Presidential File Cy.

Mr. Karl R. Goller, Assistant Director
for Operating Reactors
Division of Reactor Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Goller:

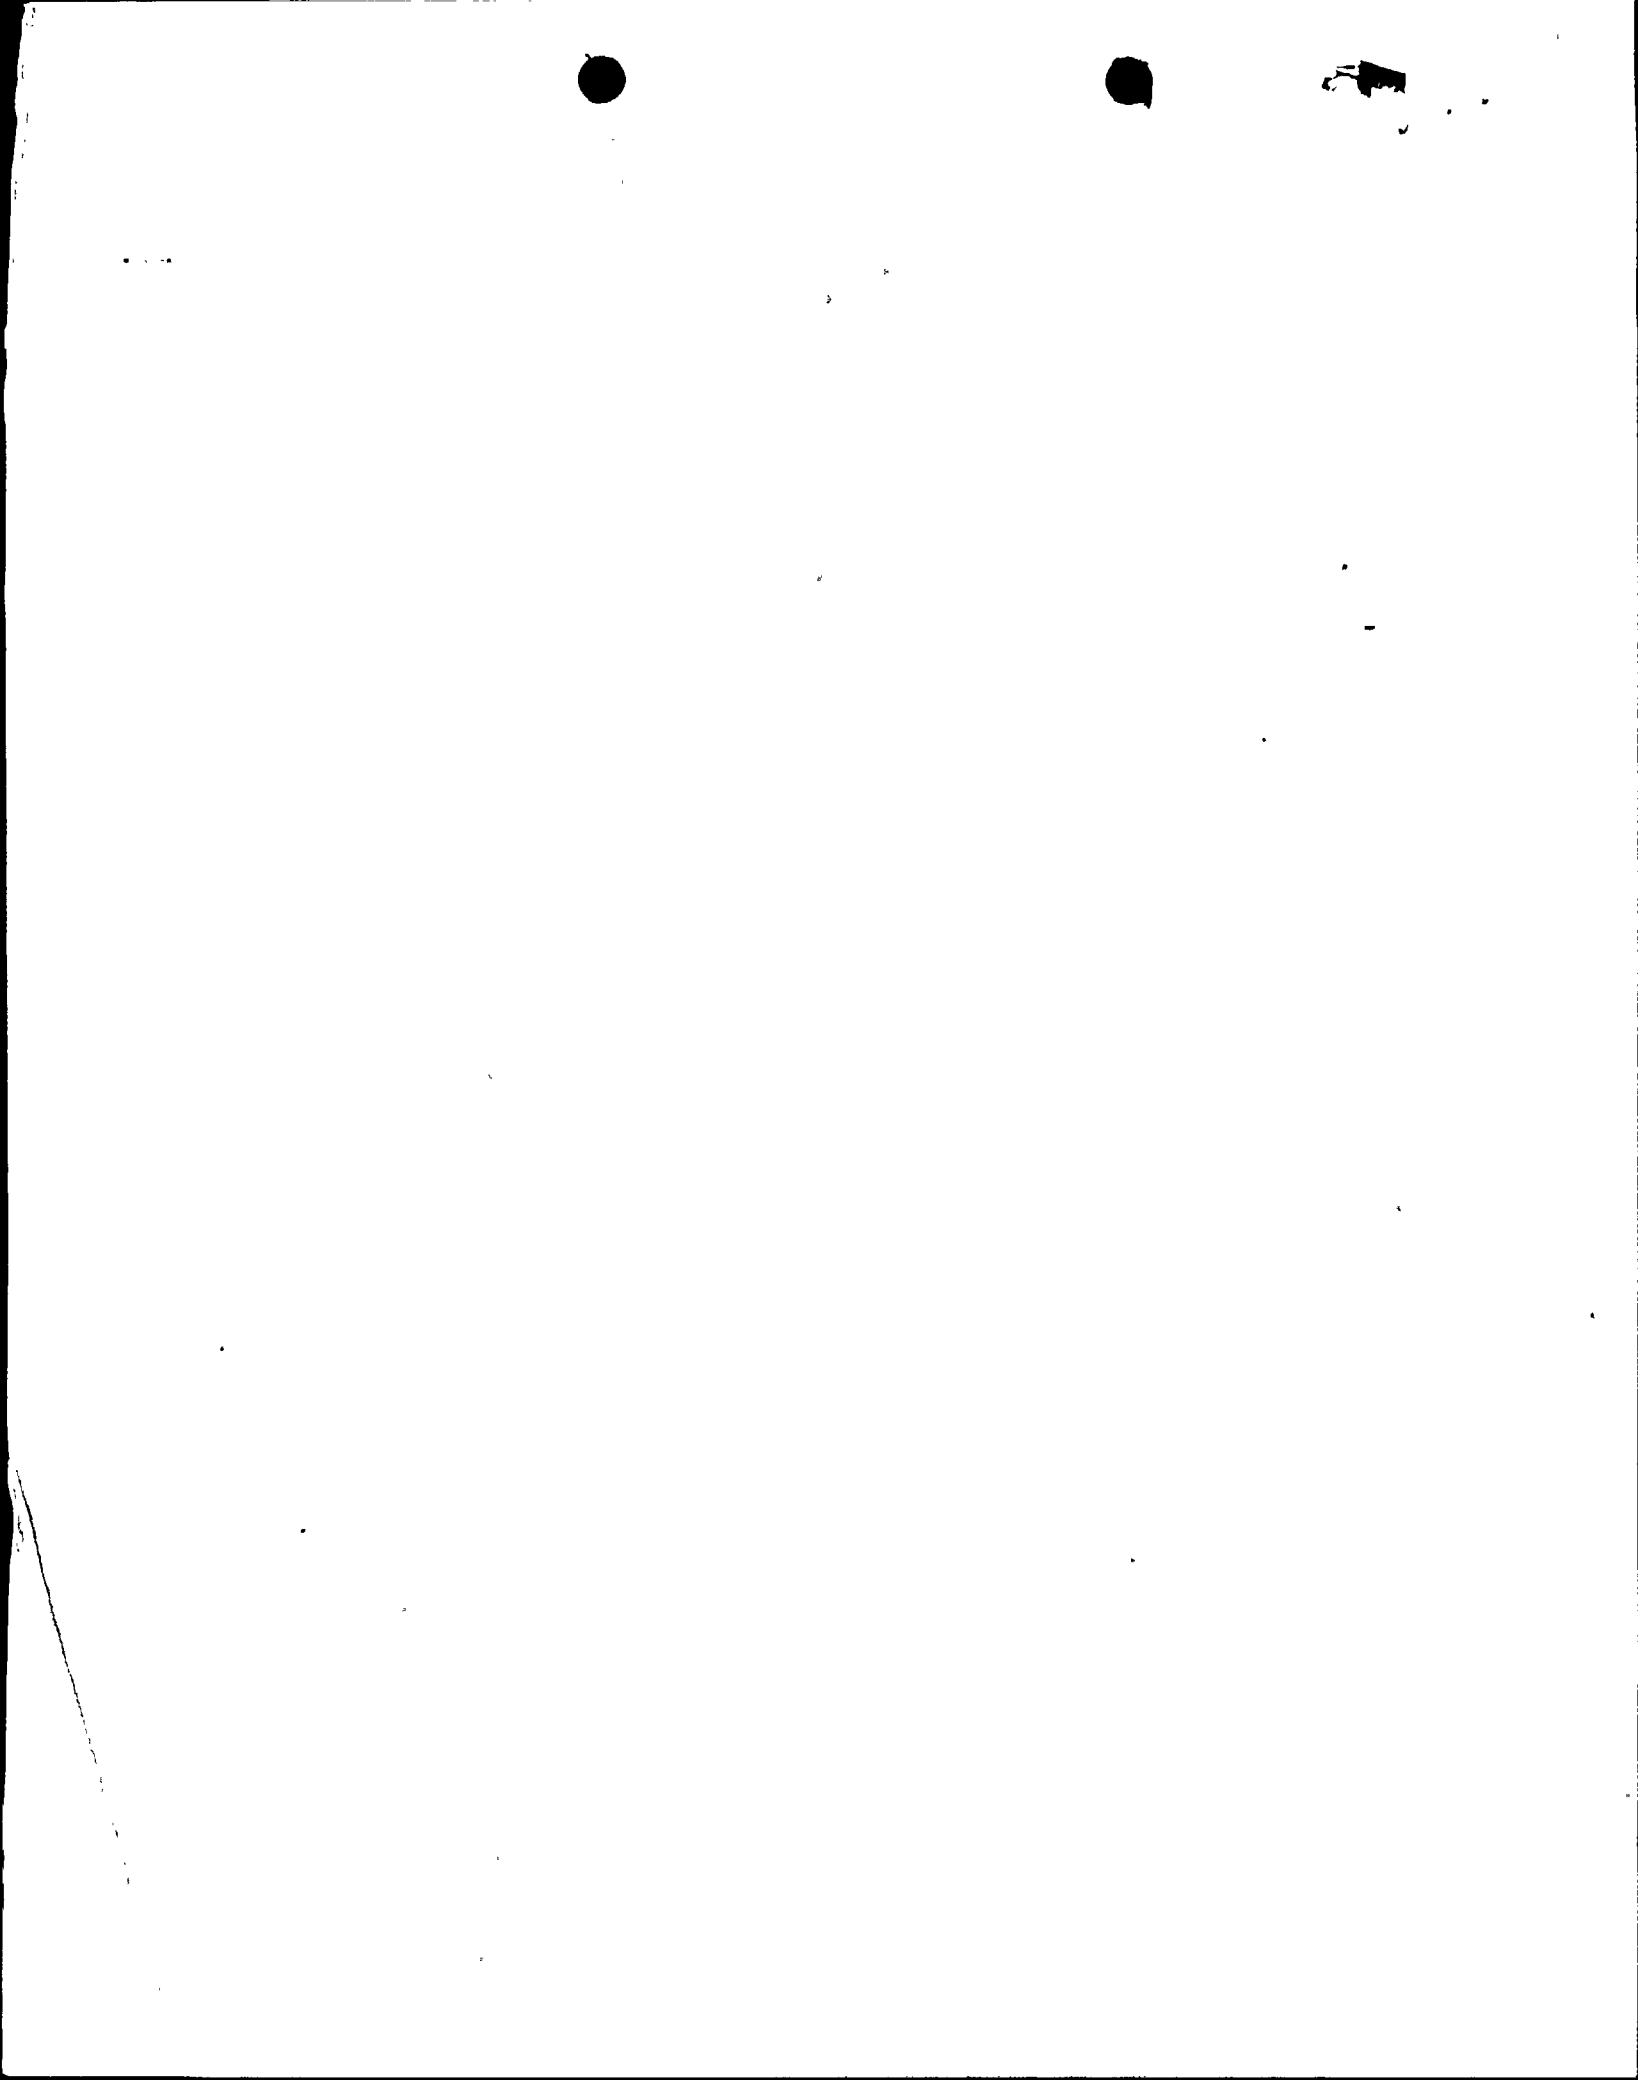

Re: Turkey Point Unit Nos. 3 and 4
Docket Nos. 50-250 and 50-251
Refueling Information Request

Your letter of June 18, 1975, requested that we provide you with certain refueling information. Enclosure 2 of your letter specified the information needed. The following input, numbered to correspond to your questions, is provided:

1. Facility: Turkey Point Unit Nos. 3 and 4
2. Next scheduled refueling shutdown:
Unit No. 3 - October 20, 1975
Unit No. 4 - April 12, 1976
3. Scheduled restart following shutdown:
Unit No. 3 - November 30, 1975
Unit No. 4 - May 23, 1976
4. It is not anticipated that refueling or resumption of operation following refueling will require a technical specification change or other license amendment for Unit No. 4. However, an increase in operating pressure may be proposed for Unit No. 3, Cycle 3, which would require reanalysis and a possible technical specification change.

Review of the reload fuel design and core configuration by our Plant Nuclear Safety Committee is scheduled for Unit No. 3 on August 18, 1975, and for Unit No. 4 on February 10, 1976. The intent of each review will be to determine if there any any unreviewed safety questions associated with core reload.

2104

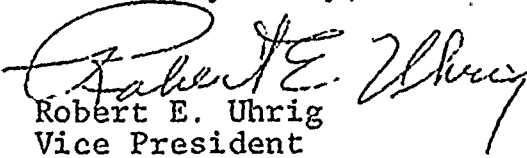

Mr. Karl R. Goller

-2-

July 28, 1975

5. Scheduled dates for submitting proposed licensing action and supporting information:
Unit No. 3 - August 20, 1975
Unit No. 4 - February 12, 1976
6. There are presently no important licensing considerations associated with refueling of either unit.

Yours very truly,

Robert E. Uhrig
Vice President
