Mr. George Lear, Chief
Operating Reactors Branch No. 3
Division of Reactor Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Lear:

Subject: Turkey Point Unit Nos. 3 and 4
Docket Nos. 50-250 and 50-251
Main Steam Isolation Valves

Reference: Nuclear Regulatory Commission letter dated May 27, 1975, from Mr. George Lear to Dr. R. E. Uhrig

The current analysis to establish the integrity of the main steam isolation valves does not consider steam flows greater than those obtained during normal operation at 100% reactor power. Consequently, additional analytical work must be completed in order to provide the information that is requested by the referenced letter. The complexity of the analysis is such that it cannot be completed prior to the middle of September, 1975.

In order to allow sufficient time for our review and to properly evaluate the results with respect to potential valve modifications, we plan to have a complete response to you no later than November 1, 1975.

Very truly yours,

Robert E. Uhrig
Vice President

REU/HNP/cpc

8004
