L-78-83

Office of Nuclear Reactor Regulation
Attention: Mr. Victor Stello, Director
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Stello:

Re: Turkey Point Unit 4
Docket Number 50-251

On March 1, 1978, Florida Power & Light Company forwarded to you a report of the current steam generator inspection and the preventative plugging program for Turkey Point Unit 4. This report supports the operation of Turkey Point Unit 4 for in excess of six effective months following the inspection. The steam generators will be reinspected during the next refueling outage.

In accordance with paragraph 3.D of Facility Operating License DPR-41, Florida Power & Light Company requests NRC approval to return Turkey Point Unit 4 to operation. This approval is requested by March 7, 1978 so as not to delay the return to power of the Unit.

The Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board have reviewed this request. They have concluded that the operation of Unit 4 for in excess of an additional six effective months will not endanger the health and safety of the public.

Very truly yours,

Robert E. Uhrig

Vice President
