REGULATORY DOCKET FILE COPY

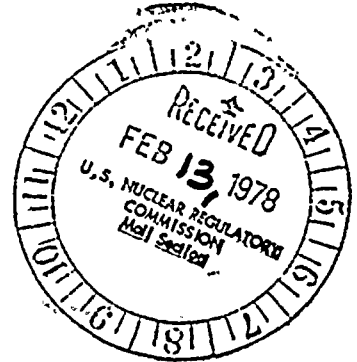

February 8, 1978
L-78-47

Office of Nuclear Reactor Regulation
Attn: Mr. George Lear, Chief
Division of Operating Reactors, Branch #3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Lear:

Re: Site Visit Fire Protection Program Evaluation
Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251

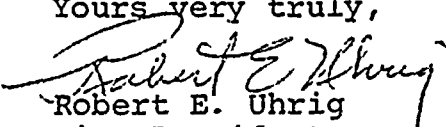

Your letter of February 7, 1978 requested that the NRC Fire Protection Review Team visit the Turkey Point Plant during the week of February 13, 1978. The conditions at the plant, however, make that week very inconvenient for us.

As you know, Turkey Point Unit 3 is scheduled to return to service following a refueling outage during that week. Also, Unit 4 is currently scheduled to undergo a steam generator inspection at that time. Because of the activities associated with the startup of Unit 3 and the inspection of Unit 4, it is difficult for us to make the appropriate personnel available to assist with your review. We would be more able to support your effort during the week beginning March 27, 1978.

We understand that you will complete your review of our Fire Protection Reevaluation Report in the near future. We would appreciate receiving any questions which were identified during your review by February 27, 1978 if the Review team intends to discuss our report during their visit.

Yours very truly,

Robert E. Uhrig
Vice President
