Director of Nuclear Reactor Regulation
Attn: Mr. Victor Stello, Director
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stello:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed Amendment to Facility
Operating Licenses DPR-31 and DPR-41

In accordance with 10 CFR 50:30, Florida Power & Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Appendix A of Facility Operating Licenses DPR-31 and DPR-41.

This proposal has been prepared in response to a September 22, 1977 letter from Mr. George Lear of your staff requesting that we submit a proposal to delete the requirement in our Technical Specifications for an Annual Operating Report. The proposed amendment is described below and is shown on the attached Technical Specification pages bearing the date of this letter in the lower right-hand corner.

Pages 6-16 through 6-18

Specification 6.9.1.b (Annual Operating Report) is revised. The due date for the Monthly Operating Report in Specification 6.9.1.c is revised from the "tenth" to the "fifteenth" of each month following the calendar month covered by the report.

Mr. Lear's letter also requested that we concurrently modify the content of our required Monthly Operating Report in accordance with three revised formats which accompanied his September 22 letter. We plan to use the revised formats starting with our monthly report for January, 1978. Along with the three report formats, we will provide a monthly "Narrative Summary of Operating Experience" that describes the operation of the facility, including major safety-related maintenance. In lieu of the 1977 Annual Operating Report we will submit a one-time only "Narrative Summary of Operating Experience" for calendar year 1977. To accommodate submittal of the expanded monthly report

773080022

SECRET

Director of Nuclear Reactor Regulation
Page Two

without affecting our existing organization, we request that the due date be extended from the tenth to the fifteenth of each month following the calendar month covered by the report.

The proposed amendment has been reviewed by the Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board. They have concluded that it does not involve an unreviewed safety question.

Very truly yours,

Al Schwartz

for Robert E. Uhrig
