Office of Nuclear Reactor Regulation  
Attention: Mr. Karl R. Goller, Assistant  
Director for Operating Reactors  
Division of Operating Reactors  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Goller:

Re: Turkey Point and St. Lucie Plants  
Docket Nos. 50-250, 50-251, 50-335  
Steam Generator Questionnaire

We have reviewed your letter of February 10, 1978, which renewed your earlier request of December 9, 1977, for information on our steam generator operating history. We recognize your desire to receive the requested information as promptly as possible. We are, therefore, pursuing the expeditious completion of the three questionnaires with our available resources; however, the busy refueling/inspection schedule over the next three months prevents concurrent completion of the tasks by March 1, 1978. Under our present schedule, the Turkey Point Unit 3 information will be submitted by April 1, 1978, to be followed by the Turkey Point Unit 4 information May 1, 1978, and the St. Lucie Unit 1 information on June 1, 1978.

Very truly yours,

A handwritten signature in dark ink, appearing to read "R. E. Uhrig", is written over a circular stamp or mark.

Robert E. Uhrig  
Vice President
