Nuclear Materials Licensing Branch
USNRC, Region III
2443 Warrenville Road, Suite 210
Lisle, Illinois 60532-4352

To whom it may concern:

This letter is to inform you that all activities covered under NRC License 21-08362-08 have stopped and decommissioning will be taking place.

DC3 Building, located at 2200 W. Salzburg Rd, Auburn, MI 48611, has made the decision to cease principal activities. This building has been the primary site of activities covered under NRC License 21-08362-08, which was recently requested to be terminated and all activities moved under the jurisdiction of NRC License 21-00265-06 in a separate submittal.

Data is currently being collected to characterize the radiological status of potentially impacted areas of the laboratories. Once this data has been collected, a decommissioning plan will be submitted for your review.

Please note that licensed activities are planned to resume at the 2200 W. Salzburg Rd. location under the NRC License 21-00265-06 within the next 12 months, so this location of use will still need to be added to License 21-00265-06. DC3 building will be decommissioned to meet NRC release criteria and either renovated for future occupancy or demolished, and a new building constructed in which loose isotopes will be used.

Thank you for your assistance with this matter. If you have any questions please contact me at (989) 496-1386.

Sincerely,

Kelly Wegener-Gave
Radiation Safety Officer
