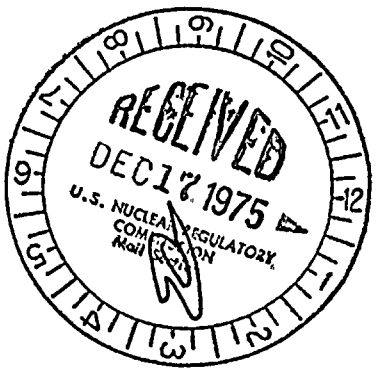
Carolina Power & Light Company



December 15, 1975

RECEIVED FOR RECORD COPY

Mr. Benard C. Rusche, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

RE: DOCKET NOS. 50-400, 50-401, 50-402, AND 50-403

Dear Mr. Rusche:

In early 1976, Carolina Power & Light Company plans to resume those activities that were previously authorized by the Commission's exemption granted on January 14, 1974. These activities include completion of excavation in the power block area, continued grading operations in previously designated areas, road upgrading, and railroad relocation. As a final step in the excavation process, the Company intends to lay a protective coating of concrete over the horizontal surface and rock slopes that are exposed in the power block area. This coating will protect these surfaces from further weathering and will maintain them in a suitable condition for later construction of the foundation and structural members.

The Company also intends to continue its site investigation process by excavating the core of the Auxiliary Dam to examine, map, and determine the suitability of this location. This investigation will allow the Company to fulfill its commitment to examine and geologically map the Auxiliary Dam. As required in Amendments 29 and 31 to the PSAR, these results will be submitted to the NRC.

It is our understanding that the Nuclear Regulatory Commission has completed its technical review of the geological fault report and the Company's answers to the Staff's requests for additional information and has concluded that the fault is no longer an issue of safety consideration. The large trenches and holes which resulted from the fault investigation will present an unnecessary safety hazard and construction inconvenience. The Company, therefore, intends to begin backfilling to restore the affected areas to the status that existed prior to the fault investigation.

336 Fayetteville Street • P. O. Box 1551 • Raleigh, N. C. 27602

14020

Please contact us if we can be of any assistance in explaining these planned activities to members of your staff. A copy of this letter is being served upon all members of the ASLB hearing process on this date.

Yours very truly,

J. A. Jones
Executive Vice President
Engineering, Construction & Operation
