C.2 52.212-4 CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS. (JAN 2017)

(a) *Inspection/Acceptance.* The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or reperformance of nonconforming services at no increase in contract price. If repair/replacement or reperformance will not correct the defects or is not possible, the Government may seek an equitable price reduction or adequate consideration for acceptance of nonconforming supplies or services. The Government must exercise its postacceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

(vii) The interest charge made under this clause may be reduced under the procedures prescribed in 32.608-2 of the Federal Acquisition Regulation in effect on the date of this contract.

(j) *Risk of loss.* Unless the contract specifically provides otherwise, risk of loss or damage to the supplies provided under this contract shall remain with the Contractor until, and shall pass to the Government upon:

(m) *Termination for cause.* The Government may terminate this contract, or any part hereof, for cause in the event of any default by the Contractor, or if the Contractor fails to comply with any contract terms and conditions, or fails to provide the Government, upon request, with adequate assurances of future performance. In the event of termination for cause, the Government shall not be liable to the Contractor for any amount for supplies or services not accepted, and the Contractor shall be liable to the Government for any and all rights and remedies provided by law. (n) *Title*. Unless specified elsewhere in this contract, title to items furnished under this contract shall pass to the Government upon acceptance, regardless of when or where the Government takes physical possession.

(o) *Warranty*. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

(p) *Limitation of liability*. Except as otherwise provided by an express warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

(t) *System for Award Management (SAM)* (1) Unless exempted by an addendum to this contract, the Contractor is responsible during performance and through final payment of any contract for the accuracy and completeness of the data within the SAM database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the SAM database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the SAM database to ensure it is current, accurate and complete. Updating information in the SAM does not alter the terms and conditions of this contract and is not a substitute for a properly executed contractual document.

(2)(i) If a Contractor has legally changed its business name, "doing business as" name, or division name (whichever is shown on the contract), or has transferred the assets used in performing the contract, but has not completed the necessary requirements regarding novation and change-of-name agreements in FAR subpart 42.12, the Contractor shall provide the responsible Contracting Officer a minimum of one

(ii) If the Contractor fails to comply with the requirements of paragraph (t)(2)(i) of this clause, or fails to perform the agreement at paragraph (t)(2)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the SAM information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the "Suspension of Payment" paragraph of the electronic funds transfer (EFT) clause of this contract.

(3) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the SAM record to reflect an assignee for the purpose of assignment of claims (see Subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the SAM database. Information provided to the Contractor's SAM record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the "Suspension of payment" paragraph of the EFT clause of this contract.

(4) Offerors and Contractors may obtain information on registration and annual confirmation requirements via SAM accessed through <https://www.acquisition.gov>.

(u) *Unauthorized Obligations.* (1) Except as stated in paragraph (u)(2) of this clause, when any supply or service acquired under this contract is subject to any End User License Agreement (EULA), Terms of Service (TOS), or similar legal instrument or agreement, that includes any clause requiring the Government to indemnify the Contractor or any person or entity for damages, costs, fees, or any other loss or liability that would create an Anti-Deficiency Act violation (31 U.S.C. 1341), the following shall govern:

(i) Any such clause is unenforceable against the Government.

(ii) Neither the Government nor any Government authorized end user shall be deemed to have agreed to such clause by virtue of it appearing in the EULA, TOS, or similar legal instrument or agreement. If the EULA, TOS, or similar legal instrument or agreement is invoked through an "I agree" click box or other comparable mechanism (e.g., "click-wrap" or "browse-wrap" agreements), execution does not bind the Government or any Government authorized end user to such clause.

(iii) Any such clause is deemed to be stricken from the EULA, TOS, or similar legal instrument or agreement.

(2) Paragraph (u)(1) of this clause does not apply to indemnification by the Government that is expressly authorized by statute and specifically authorized under applicable agency regulations and procedures.

(v) *Incorporation by reference.* The Contractor's representations and certifications, including those completed electronically via the System for Award Management (SAM), are incorporated by reference into the contract.

(End of clause)

C.6 COMPLIANCE WITH SECTION 508 OF THE REHABILITATION ACT OF 1973, AS AMENDED (SEP 2013)

In 1998, Congress amended the Rehabilitation Act of 1973 (29 U.S.C. §794d) as amended by the Workforce Investment Act of 1998 (P.L. 105 - 220), August 7, 1998 to require Federal agencies to make their electronic and information technology (EIT) accessible to people with disabilities. Inaccessible technology interferes with an ability to obtain and use information quickly and easily. Section 508 was enacted to eliminate barriers in information technology, open new opportunities for people with disabilities, and encourage development of technologies that will help achieve these goals. The law applies to all Federal agencies when they develop, procure, maintain, or use electronic and information technology. Under Section 508 (29 U.S.C. §794d), agencies must give

disabled employees and members of the public access to information that is comparable to access available to others.

Specifically, Section 508 of that Act requires that when Federal agencies develop, procure, maintain, or use EIT, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use by Federal employees who are not individuals with disabilities, unless an undue burden would be imposed on the agency. (36 C.F.R. §1194 implements Section 508 of the Rehabilitation Act of 1973, as amended, and is viewable at: <http://www.access-board.gov/sec508/standards.htm>)

Exceptions.

All EIT that the government acquires by purchase or by lease/rental under this contract must meet the applicable accessibility standards at 36 C.F.R. Part 1194, unless one or more of the following exceptions at FAR 39.204 applies to this acquisition (applicable if checked):

The EIT is for a national security system.

The EIT is acquired by a contractor incidental to a contract.

The EIT is located in spaces frequented only by service personnel for maintenance, repair or occasional monitoring of equipment.

Compliance with the applicable 36 C.F.R. Part 1194 provisions would impose an undue burden on the agency.

Applicable Standards.

The following accessibility standards from 36 C.F.R. Part 1194 have been determined to be applicable to this contract/order. See www.section508.gov for more information:

1194.21 Software applications and operating systems.

1194.22 Web-based intranet and internet information and applications. 16 rules.

1194.23 Telecommunications products.

1194.24 Video and multimedia products.

1194.25 Self contained, closed products.

1194.26 Desktop and portable computers.

1194.31 Functional performance criteria.

1194.41 Information, documentation, and support.

Note: Under the Exceptions paragraph, the Contracting Officer should check the boxes for any exceptions that apply. If no exceptions apply, then the Contracting Officer should, under the Applicable Standards paragraph, check the boxes that indicate which of the

standards apply. See FAR Subpart 39.2 and www.section508.gov for additional guidance.

STATEMENT OF WORK

1. PROJECT TITLE

PTV Vissim Software Training to Support Evaluation of Evacuation Time Estimate for Severe Accident Consequence Analysis.

2. BACKGROUND

The U.S. Nuclear Regulatory Commission's (NRC) mission is to license and regulate the Nation's civilian use of radioactive materials to provide reasonable assurance of adequate protection of public health and safety and to promote the common defense and security and to protect the environment. Minimizing the likelihood of accidents and reducing the consequence of an accident (should one occur) are the key elements for achieving the NRC's safety goals. The agency must ensure that effective preparedness and response programs are in place if an accident were to occur. Site specific evacuation time estimate from traffic studies are needed to estimate exposures to radiation, if released during a severe accident. These input are required for developing input decks and guidance documents for NRC's MELCOR Accident Consequence Code System (MACCS) software tool. NRC also use MACCS code for confirmatory and anticipatory research to resolve safety issues and inform rulemaking, licensing, oversight, and other regulatory activities.

NRC has bought licenses of specialized software called PTV Vissim to develop models of evacuation planning. NRC staff who are involved in regulatory research, protective actions, or those who using MACCS codes for consequence analysis require training using PTV Vissim software.

3. OBJECTIVE

The objective of this contract is to obtain the services of a qualified contractor to provide PTV Vissim training course modules, including training material and instructional services, for the training in traffic flow simulations using PTV Vissim software. This includes providing licenses of PTV Vissim software during the hands-on training session for up to 10 users. The scope of this contract can be covered in a 3 day hands on course to be delivered at NRC provided training facility. The training will enable NRC staff to evaluate evacuation time estimate for severe accident consequence analysis.

4. SCOPE OF WORK

Within two weeks after contract award, the instructor or coordinator will participate in a kick-off meeting with the Contracting Officer's Representative (COR) to clarify expectations, finalize training requirements, hardware/software configuration, room setup, date of training and timing etc. and resolve any questions on content delivery and schedule. This meeting can be online or via conference call.

The contractor shall conduct a 3-day training course, for up to 10 NRC staff, to enable them to perform simulations using Vissim software to ascertain evacuation time estimates during emergencies, from “emergency planning zones” around a facility. These zones can be from few miles to beyond 50 miles in various patterns, to protect public from plumes of radiations.

Specifically the training shall enable staff to perform the following using PTV Vissim software:

- a. Describe and select features, functionality, and limitations of PTV Vissim software
- b. Build network models for traffic simulations, run simulations, and analysis results
- c. Build and run urban and rural traffic simulation model in PTV Vissim software
- d. Identify input data required and identify parameters suited for calibration.
- e. Utilize best practice and efficient use of PTV Vissim features.
- f. Conduct traffic studies.
- g. Set up dynamic traffic assignments and demand distributions for realistic estimates of traffic flow timings and choking points.

The course attendees are expected to be NRC technical staff, typically scientist and engineer involves in nuclear consequence analysis or protective actions. They have little or no experience in traffic engineering.

The course is expected to be held November 5-7, 2018. The course is expected to start no later than 9:00 am, with one (1) hour lunch break, and end no later than 5:00 pm, and include standard breaks on each day.

The course content shall be provided by the contractor and typically expected to include in paper or electronics format of the following items for each student.

- a. Agenda/Course Outline
- b. Presentation Slides in MS PowerPoint as needed.
- c. Student handouts such as a booklet, list of references etc.
- d. Hands –on learning exercises for each module for interactive learning and discussion.

NRC will collect course feedback after completion of training. A copy of student comments and feedback can be provided to the contractor, if available and requested by the contractor.

The contractor shall not collect or take any information, such as names and personnel information about attendees or any other NRC documents shared during training without prior written permission from the COR.

NRC reserves the right to cancel any session with a two week notices without cost to the government.

5. PERSONNEL AND QUALIFICATION REQUIREMENTS

The contractor shall designate an individual, who shall be responsible for supervising the performance of work under the contract and who shall ensure quality assurance in meeting the objectives and goals of the training and the focal point for any problems which may arise. This designated individual is not required to be present during all training, however the contractor may have the instructor serve in this capacity.

The course instructor must have a certification in training PTV Vissim courses and at least 2 years of experience and expertise in features, functionalities, limitations, and application of PTV Vissim software.

6. DELIVERABLES

Course materials for each attendee, e.g. agenda/course outline, presentation slides, handouts, and learning exercises, to be provided at the start of the course. Student must be allowed to keep all materials for future reference. Materials can be provided in hard copy or electronic media.

7. CONTRACTOR FURNISHED ITEMS

Licenses of PTV Vissim software and keys for each attendee (up to 10 licenses) to be used during training for hands-on exercises.

Access to web is limited and may not be available during training and no USB or any other hardware can normally be connected to NRC computers. If any special hardware is required such as USB license, the contractor shall inform the COR.

Laptop for each attendee (up to 10 laptops) to use to perform hands on exercises.

8 NRC FURNISHED ITEMS

NRC will furnish the training classroom with board, easel and LCD projector.

9. QUALITY ASSURANCE PLAN

The training material shall be of good quality, free from errors, as expected in typical commercial training.

10. PERIOD OF PERFORMANCE

Refer to Section C.13

11. PLACE OF PERFORMANCE

Training is expected to be held at the NRC Headquarters in Rockville, Maryland.

12. TRAVEL

One, one-person, three-day training, at NRC Headquarters in Rockville, Maryland

13. SECURITY REQUIREMENTS

Upon arrival at NRC Headquarters to participate in the training, contractor personnel are required to check-in at the security desk to obtain a visitor's badge and to meet NRC escort. Contractor must be escorted at all times while in an NRC Building, unless directed otherwise by the COR.
