**Subject:** [External\_Sender] Notice of a Proposed Agreement with the State of Wyoming

Paul,

The Northern Arapaho Tribal Historic Preservation Office (THPO) sent comments against this agreement between the NRC and the State of Wyoming to assume regulatory authority over the management and disposal of byproduct materials as defined in Section 11e.(2) of the AEA and a subcategory of source material associated with uranium and thorium milling within the State. The Northern Arapaho THPO also requested all tribes who identify the state of Wyoming as part of their ancestral migratory territory be consulted, this includes the Northern Arapaho and Eastern Shoshone tribes.

Please contact our office if you have any questions.

Thanks,  
Crystal
