Smith Ranch License Renewal – Environmental Assessment Comments

After reviewing your request under the Section 106 process of the NHPA, and NEPA, our office would like to offer the following response: **“Adverse Effect”** to Historic Properties within the direct and in-direct APE of the license area. I would like to request a face to face Government to Government consultation with tribes to discuss the potential impacts that this project may have to Historic Properties and Cultural Resources located within the Direct and In-Direct APE. Also, I believe that there are multiple sites listed in the Environmental Assessment that need tribal reviews. I would like to request that the site forms for each individual site identified in the cultural resource inventories be sent to my e-mail for review so that I can determine eligibility recommendations. I look forward to working with you to first avoid, minimize and mitigate the effects to historic properties and cultural resources that this project may pose. If you should have any questions or comments, please contact me at any time.

Thank you for consulting with the Northern Arapaho THPO and have a Good Day!!

Devin B. Oldman
