

Eastern Indigo Snake (*Drymarchon couperi*) M-Rc Survey Form

Capture Date: 10-19-16 Personnel: Mario Aldecoa

Capture Time: 9:50 am

Capture Location (Lat/Long or UTM, specify DATUM with UTM):

17R 0566541 UTM 28 04203 south of cooling  
canals, south of  
Steel bridge.

Processing Date: 10-19-16

Snout-Vent Length (cm): 140.1

Tail Length (cm): 27.2

- measured without restraining tubes - not very accurate

Weight (kg): 1.48

Sex: F

→ I suspect some  
egg impaction

New Capture or Recapture (circle one)

PIT tag #: 836547591

Scale Clip #: L-7, R-8

Clip Saved (Y/N):

Shedding (or cloudy eyes):

Skin Lesions: Blisters on ventral scales close to cloaca

Bite Marks or Injuries: Possible two egg(s) impaction, or two distinct  
large lumps toward cloaca.

Weather When Captured (air temp, cloud cover, precipitation, etc.):

Habitat: Dist. mangrove / poison wood habitat by dirt  
Rd.

Behavior: Crossing road into mangrove habitat.

Comments:

- Scale clips did not look prominent and appear to have  
healed. Avid chip was main method of identification.

Eastern Indigo Snake (*Drymarchon couperi*) M-Rc Survey Form

Capture Date: 5-14-16

Personnel: Mario Aldecoa

Capture Time: 9:45 am

Capture Location (Lat/Long or UTM, specify DATUM with UTM):

South of steel bridge 17R 0566508

South of cooling canals 2804105

Processing Date:

5-14-16

Snout-Vent Length (cm): 124.2

Tail Length (cm): 21.6

Weight (kg): 0.57

Sex: F

New Capture or Recapture (circle one)

PIT tag #: 836557526

Scale Clip #: L-7, R-9  
\*

Clip Saved (Y/N):

Shedding (or cloudy eyes): X

Skin Lesions: X

Bite Marks or Injuries: X

Weather When Captured (air temp, cloud cover, precipitation, etc.):

Cloud cover - 40%

Habitat: Disturbed, poison wood, Aust. pine.

Behavior: Crossing Rd in the direction of a canal and mangroves

Comments:

Temp - 28.6      Sunny  
humidity - 72.0  
wind - 1.2

Eastern Indigo Snake (*Drymarchon couperi*) M-Rc Survey Form

Capture Date: 3-7-16

Personnel: Mario Aldecoa

Capture Time: 10:00am

Capture Location (Lat/Long or UTM, specify DATUM with UTM):

South of cooling canals, S of steel bridge 17R 0566506  
UTM 2804354

Processing Date: 3-7-16

Snout-Vent Length (cm): 134

Tail Length (cm): 27.6

Weight (kg): 1.6 kg

Sex: M

New Capture or Recapture (circle one)

PIT tag #: 836547591

Scale Clip #: L-7, R-8

Clip Saved (Y/N): yes

Shedding (or cloudy eyes):

Skin Lesions:

Bite Marks or Injuries: Two blisters of bite marks on left portion of body, as well as a kink in spinal dorsal area, possible old wound.

Weather When Captured (air temp, cloud cover, precipitation, etc.):

Habitat: Road leading into mangroves

Behavior: crossing rd foraging

Comments:

Eastern Indigo Snake (*Drymarchon couperi*) M-Rc Survey Form

Capture Date: 2-17-16 Personnel: Mario Aldecoa

Capture Time: 10:15am

Capture Location (Lat/Long or UTM, specify DATUM with UTM):

South croc mit. Sanctuary UTM 17R0566073  
2804047

Processing Date: 2-17-16

Snout-Vent Length (cm): 152.0

Tail Length (cm): 32.6

Weight (kg): 1.5 kg

Sex: M

New Capture or Recapture (circle one)

PIT tag #: 836576833

Scale Clip #: L-6, R-7

Clip Saved (Y/N): Yes

Shedding (or cloudy eyes): NO

Skin Lesions: small blister on left portion of body near head  
(Neck area)

Bite Marks or Injuries:

Weather When Captured (air temp, cloud cover, precipitation, etc.):

partly cloudy

Habitat: mix veg, poison wood and shrubs

Behavior: Basking on a mound of dirt. Did not move until  
F approached within grabbing distance.

Comments: !!!

(Temp: 23.9°C) (Wind: 1.9) (% Humidity: 51.9)
