Sridhar Banuru, M.D.
Vice President
The Heart Group
4015 Gateway Boulevard
Suite 2120
Newburgh, IN 47630-8925

Dear Dr. Banuru:

Enclosed is Amendment No. 19 to your NRC Material License No. 13-24706-01 in accordance with your request.

This amendment terminates your license no. 13-24706-01 concurrent with the addition of your licensed program as a new location of use at 4007 Gateway Boulevard, Newburgh, Indiana under license no. 13-00142-02.

This was done in accordance with the requests made in the letter dated May 29, 2018, signed by Lynn Lingafelter, Chief Operating Officer for Deaconess Hospital, Inc., and you, Sridhar Banuru, M.D., Vice President for The Heart Group.

The amendment for Deaconess Hospital has been sent under separate cover to the attention of John P. Sutkowski, M.D., Radiation Safety Officer.

Since licensed activities have continued at The Heart Group, it was directly merged into the license for Deaconess Hospital. No final status surveys were necessary due to licensed activities being conducted continuously while the amendment and termination requests were pending completion.

Please note that, in the course of conducting this review, we noted that no facility diagrams were submitted for The Heart Group location, in order for it to be added to the license. As an interim measure, we added the letter dated May 17, 2012, from The Heart Group license, condition no. 14.A., as it should have appeared, excluding reference to the location at 415 W. Columbia Street, Evansville, Indiana. This letter appears on condition no. 14.A. of Amendment No. 18 for license no. 13-24706-01 as "Application dated May 23, 2012," which was incorrect. It should have been identified as "the letter dated May 17, 2012."

We have requested updated and current diagrams from Deaconess Hospital in the cover letter for the amendment adding The Heart Group as a new location of use. Deaconess Hospital's letter contains instructions on how to prepare and transmit the diagrams. We are not requesting this from you as your license has been terminated. This is for your information only.

S. Banuru

- 2 -

Should you be interested, we must always have facility diagrams to accompany location of use additions to an NRC license. The new location's address will appear in Condition No. 10, when approved, but the facility itself is connected to the license via diagrams linked to the new address in a document which is then placed in the last condition of the license called "the tie-down condition." This is how it becomes a part of a license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078. My email address is colleen.casey@nrc.gov.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
