SECTION A - Solicitation/Contract Form

A.1 BRIEF PROJECT TITLE AND WORK DESCRIPTION

(a) The title of this project is: TRACE Plant Model Development and Maintenance in Anticipation of New Rulemaking and Exploratory Simulations

(b) Summary work description: The contractor shall provide technical assistance in the updating, verifying, and documenting of the TRACE models for H.B. Robinson Unit 2, Saint Lucie Units 1 and 2, and Callaway Unit 1. Additionally, the contractor shall update the MAKECHAN-2 computer code and develop user guidelines for using the TRACE CHAN and Containment components

(End of Clause)

A.2 CONSIDERATION AND OBLIGATION-TASK ORDERS

(a) The ceiling of this order for services is \$446,662.10.

(b) This order is subject to the minimum and maximum ordering requirements set forth in the contract.

(c) The amount presently obligated with respect to this order is \$425,000.00. The obligated amount shall, at no time, exceed the order ceiling as specified in paragraph (a) above. When and if the amount(s) paid and payable to the Contractor hereunder shall equal the obligated amount, the Contractor shall not be obligated to continue performance of the work unless and until the Contracting Officer shall increase the amount obligated with respect to this order, in accordance with FAR Part 43 - Modifications. Any work undertaken by the Contractor in excess of the obligated amount specified above is done so at the Contractor's sole risk and may not be reimbursed by the Government.

(d) The Contractor shall comply with the provisions of FAR 52.232-22 - Limitation of Funds, for incrementally-funded delivery orders or task orders.

(End of clause)

A.4 TASK/DELIVERY ORDER PERIOD OF PERFORMANCE (SEP 2013)

This order shall commence on September 10, 2018 and will expire on August 31, 2019.

(End of Clause)

A.5 2052.215-70 KEY PERSONNEL (JAN 1993)

(a) The following individuals are considered to be essential to the successful performance of the work hereunder:

████████████████████

██████████

██████████

*The contractor agrees that personnel may not be removed from the contract work or replaced without compliance with paragraphs (b) and (c) of this section.

(b) If one or more of the key personnel, for whatever reason, becomes, or is expected to become, unavailable for work under this contract for a continuous period exceeding 30 work days, or is expected to devote substantially less effort to the work than indicated in the proposal or initially anticipated, the contractor shall immediately notify the contracting officer and shall, subject to the concurrence of the contracting officer, promptly replace the personnel with personnel of at least substantially equal ability and qualifications.

(c) Each request for approval of substitutions must be in writing and contain a detailed explanation of the circumstances necessitating the proposed substitutions. The request must also contain a complete resume for the proposed substitute and other information requested or needed by the contracting officer to evaluate the proposed substitution.

The contracting officer and the project officer shall evaluate the contractor's request and the contracting officer shall promptly notify the contractor of his or her decision in writing.

(d) If the contracting officer determines that suitable and timely replacement of key personnel who have been reassigned, terminated, or have otherwise become unavailable for the contract work is not reasonably forthcoming, or that the resultant reduction of productive effort would be so substantial as to impair the successful completion of the contract or the service order, the contract may be terminated by the contracting officer for default or for the convenience of the Government, as appropriate. If the contracting officer finds the contractor at fault for the condition, the contract price or fixed fee may be equitably adjusted downward to compensate the Government for any resultant delay, loss, or damage.

A.6 2052.215-71 CONTRACTING OFFICER REPRESENTATIVE (COR) AUTHORITY. (OCT 1999)

(a) The contracting officer's authorized representative hereinafter referred to as the COR for this contract is:

Name: [REDACTED]

Address: [REDACTED]

[REDACTED] [REDACTED]

(b) Performance of the work under this contract is subject to the technical direction of the NRC project officer. The term technical direction is defined to include the following:

(1) Technical direction to the contractor which shifts work emphasis between areas of work or tasks, authorizes travel which was unanticipated in the Schedule (i.e., travel not contemplated in the Statement of Work or changes to specific travel identified in the Statement of Work), fills in details, or otherwise serves to accomplish the contractual statement of work.

(2) Provide advice and guidance to the contractor in the preparation of drawings, specifications, or technical portions of the work description.

(3) Review and, where required by the contract, approve technical reports, drawings, specifications, and technical information to be delivered by the contractor to the Government under the contract.

(c) Technical direction must be within the general statement of work stated in the contract. The project officer does not have the authority to and may not issue any technical direction which:

(1) Constitutes an assignment of work outside the general scope of the contract.

(2) Constitutes a change as defined in the "Changes" clause of this contract.

(3) In any way causes an increase or decrease in the total estimated contract cost, the fixed fee, if any, or the time required for contract performance.

(4) Changes any of the expressed terms, conditions, or specifications of the contract.

(5) Terminates the contract, settles any claim or dispute arising under the contract, or issues any unilateral directive whatever.

(d) All technical directions must be issued in writing by the project officer or must be confirmed by the project officer in writing within ten (10) working days after verbal issuance. A copy of the written direction must be furnished to the contracting officer. A copy of NRC Form 445, Request for Approval of Official Foreign Travel, which has received final approval from the NRC must be furnished to the contracting officer.

(e) The contractor shall proceed promptly with the performance of technical directions duly issued by the project officer in the manner prescribed by this clause and within the project officer's authority under the provisions of this clause.

(f) If, in the opinion of the contractor, any instruction or direction issued by the project officer is within one of the categories defined in paragraph (c) of this section, the contractor may not proceed but shall notify the contracting officer in writing within five (5) working days after the receipt of any instruction or direction and shall request that contracting officer to modify the contract accordingly. Upon receiving the notification from the contractor, the contracting officer shall issue an appropriate contract modification or advise the contractor in writing that, in the contracting officer's opinion, the technical direction is within the scope of this article and does not constitute a change under the "Changes" clause.

(g) Any unauthorized commitment or direction issued by the project officer may result in an unnecessary delay in the contractor's performance and may even result in the contractor expending funds for unallowable costs under the contract.

(h) A failure of the parties to agree upon the nature of the instruction or direction or upon the contract action to be taken with respect to the instruction or direction is subject to 52.233-1 - Disputes.

(i) In addition to providing technical direction as defined in paragraph (b) of the section, the project officer shall:

(1) Monitor the contractor's technical progress, including surveillance and assessment of performance, and recommend to the contracting officer changes in requirements.

(2) Assist the contractor in the resolution of technical problems encountered during performance.

(3) Review all costs requested for reimbursement by the contractor and submit to the contracting officer recommendations for approval, disapproval, or suspension of payment for supplies and services required under this contract.

(End of Clause)

A.7 AWARD NOTIFICATION AND COMMITMENT OF PUBLIC FUNDS

(a) All offerors will receive preaward and postaward notices in accordance with FAR 15.503.

(b) It is also brought to your attention that the contracting officer is the only individual who can legally obligate funds or commit the NRC to the expenditure of public funds in connection with this procurement. This means that unless provided in a contract document or specifically authorized by the contracting officer, NRC technical personnel may not issue contract modifications, give formal contractual commitments, or otherwise bind, commit, or obligate the NRC contractually. Informal unauthorized commitments, which do not obligate the NRC and do not entitle the contractor to payment, may include:

- (1) Encouraging a potential contractor to incur costs prior to receiving a contract;
- (2) Requesting or requiring a contractor to make changes under a contract without formal contract modifications;
- (3) Encouraging a contractor to incur costs under a cost-reimbursable contract in excess of those costs contractually allowable; and
- (4) Committing the Government to a course of action with regard to a potential contract, contract change, claim, or dispute.

(End of Clause)

A.8 USE OF AUTOMATED CLEARING HOUSE (ACH) ELECTRONIC PAYMENT/REMITTANCE ADDRESS

The Debt Collection Improvement Act of 1996 requires that all Federal payments except IRS tax refunds be made by Electronic Funds Transfer. It is the policy of the Nuclear Regulatory Commission to pay government vendors by the Automated Clearing House (ACH) electronic funds transfer payment system. Item 15C of the Standard Form 33 may be disregarded.

(End of Clause)

A.9 GREEN PURCHASING (SEP 2015)

(a) In furtherance of the sustainable acquisition goals of Executive Order (EO) 13693, "Planning for Federal Sustainability in the Next Decade," products and services provided under this contract/order shall be energy efficient (EnergyStar® or Federal Energy Management Program - FEMP-designated products), water efficient, biobased, environmentally preferable (excluding EPEAT®-registered products), non-ozone depleting, contain recycled content, or are non- or low toxic alternatives or hazardous constituents (e.g., non-VOC paint), where such products and services meet agency performance requirements. See: Executive Order (EO) 13693, "Planning for Federal Sustainability in the Next Decade."

(b) The NRC and contractor may negotiate during the contract term to permit the substitution or addition of designated recycled content products (i.e., Comprehensive Procurement Guidelines - CPG), EPEAT®-registered products, EnergyStar®- and FEMP designated energy efficient products and appliances, USDA designated biobased products (Biopreferred® program), environmentally preferable products, WaterSense and other water efficient products, products containing non- or lower-ozone depleting substances (i.e., SNAP), and products containing non- or low-toxic or hazardous

constituents (e.g., non-VOC paint), when such products and services are readily available at a competitive cost and satisfy the NRC's performance needs.

(c) The contractor shall flow down this clause into all subcontracts and other agreements that relate to performance of this contract/order.

(End of Clause)

A.10 WHISTLEBLOWER PROTECTION FOR NRC CONTRACTOR AND SUBCONTRACTOR EMPLOYEES

(a) The U.S. Nuclear Regulatory Commission (NRC) contractor and its subcontractor are subject to the Whistleblower Employee Protection public law provisions as codified at 42 U.S.C. 5851. NRC contractor(s) and subcontractor(s) shall comply with the requirements of this Whistleblower Employee Protection law, and the implementing regulations of the NRC and the Department of Labor (DOL). See, for example, DOL Procedures on Handling Complaints at 29 C.F.R. Part 24 concerning the employer obligations, prohibited acts, DOL procedures and the requirement for prominent posting of notice of Employee Rights at Appendix A to Part 24 entitled: "Your Rights Under the Energy Reorganization Act".

(b) Under this Whistleblower Employee Protection law, as implemented by regulations, NRC contractor and subcontractor employees are protected from discharge, reprisal, threats, intimidation, coercion, blacklisting or other employment discrimination practices with respect to compensation, terms, conditions or privileges of their employment because the contractor or subcontractor employee(s) has provided notice to the employer, refused to engage in unlawful practices, assisted in proceedings or testified on activities concerning alleged violations of the Atomic Energy Act of 1954 (as amended) and the Energy Reorganization Act of 1974 (as amended).

(c) The contractor shall insert this or the substance of this clause in any subcontracts involving work performed under this contract.

(End of Clause)

A.11 2052.209-72 CONTRACTOR ORGANIZATIONAL CONFLICTS OF INTEREST. (JAN 1993)

(a) Purpose. The primary purpose of this clause is to aid in ensuring that the contractor:

(1) Is not placed in a conflicting role because of current or planned interests (financial, contractual, organizational, or otherwise) which relate to the work under this contract; and

(2) Does not obtain an unfair competitive advantage over other parties by virtue of its performance of this contract.

(b) Scope. The restrictions described apply to performance or participation by the contractor, as defined in 48 CFR 2009.570-2 in the activities covered by this clause.

(c) Work for others.

(1) Notwithstanding any other provision of this contract, during the term of this contract, the contractor agrees to forego entering into consulting or other contractual arrangements with any firm or organization the result of which may give rise to a conflict of interest with respect to the work being performed under this contract. The contractor shall ensure that all employees under this contract abide by the provision of this clause. If the contractor has reason to believe, with respect to itself or any employee, that any proposed consultant or other contractual arrangement with any firm or organization may involve a potential conflict of interest, the contractor shall obtain the written approval of the contracting officer before the execution of such contractual arrangement.

(2) The contractor may not represent, assist, or otherwise support an NRC licensee or applicant undergoing an NRC audit, inspection, or review where the activities that are the subject of the audit, inspection, or review are the same as or substantially similar to the services within the scope of this contract (or task order as appropriate) except where the NRC licensee or applicant requires the contractor's support to explain or defend the contractor's prior work for the utility or other entity which NRC questions.

(3) When the contractor performs work for the NRC under this contract at any NRC licensee or applicant site, the contractor shall neither solicit nor perform work in the same or similar technical area for that licensee or applicant organization for a period commencing with the award of the task order or beginning of work on the site (if not a task order contract) and ending one year after completion of all work under the associated task order, or last time at the site (if not a task order contract).

(4) When the contractor performs work for the NRC under this contract at any NRC licensee or applicant site,

(i) The contractor may not solicit work at that site for that licensee or applicant during the period of performance of the task order or the contract, as appropriate.

(ii) The contractor may not perform work at that site for that licensee or applicant during the period of performance of the task order or the contract, as appropriate, and for one year thereafter.

(iii) Notwithstanding the foregoing, the contracting officer may authorize the contractor to solicit or perform this type of work (except work in the same or similar technical area) if the contracting officer determines that the situation will not pose a potential for technical bias or unfair competitive advantage.

(d) Disclosure after award.

(1) The contractor warrants that to the best of its knowledge and belief, and except as otherwise set forth in this contract, that it does not have any organizational conflicts of interest as defined in 48 CFR 2009.570-2.

(2) The contractor agrees that if, after award, it discovers organizational conflicts of interest with respect to this contract, it shall make an immediate and full disclosure in writing to the contracting officer. This statement must include a description of the action which the contractor has taken or proposes to take to avoid or mitigate such conflicts. The NRC may, however, terminate the contract if termination is in the best interest of the Government.

(3) It is recognized that the scope of work of a task-order-type contract necessarily encompasses a broad spectrum of activities. Consequently, if this is a task-order-type contract, the contractor agrees that it will disclose all proposed new work involving NRC licensees or applicants which comes within the scope of work of the underlying contract. Further, if this contract involves work at a licensee or applicant site, the contractor agrees to exercise diligence to discover and disclose any new work at that licensee or applicant site. This disclosure must be made before the submission of a bid or proposal to the utility or other regulated entity and must be received by the NRC at least 15 days before the proposed award date in any event, unless a written justification demonstrating urgency and due diligence to discover and disclose is provided by the contractor and approved by the contracting officer. The disclosure must include the statement of work, the dollar value of the proposed contract, and any other documents that are needed to fully describe the proposed work for the regulated utility or other regulated entity. NRC may deny approval of the disclosed work only when the NRC has issued a task order which includes the technical area and, if site-specific, the site, or has plans to issue a task order which includes the technical area and, if site-specific, the site, or when the work violates paragraphs (c)(2), (c)(3) or (c)(4) of this section.

(e) Access to and use of information.

(1) If, in the performance of this contract, the contractor obtains access to information, such as NRC plans, policies, reports, studies, financial plans, internal data protected by the Privacy Act of 1974 (5 U.S.C. Section 552a (1988)), or the Freedom of Information Act (5 U.S.C. Section 552 (1986)), the contractor agrees not to:

(i) Use this information for any private purpose until the information has been released to the public;

(ii) Compete for work for the Commission based on the information for a period of six months after either the completion of this contract or the release of the information to the public, whichever is first;

(iii) Submit an unsolicited proposal to the Government based on the information until one year after the release of the information to the public; or

(iv) Release the information without prior written approval by the contracting officer unless the information has previously been released to the public by the NRC.

(2) In addition, the contractor agrees that, to the extent it receives or is given access to proprietary data, data protected by the Privacy Act of 1974 (5 U.S.C. Section 552a (1988)), or the Freedom of Information Act (5 U.S.C. Section 552 (1986)), or other confidential or privileged technical, business, or financial information under this contract, the contractor shall treat the information in accordance with restrictions placed on use of the information.

(3) Subject to patent and security provisions of this contract, the contractor shall have the right to use technical data it produces under this contract for private purposes provided that all requirements of this contract have been met.

(f) Subcontracts. Except as provided in 48 CFR 2009.570-2, the contractor shall include this clause, including this paragraph, in subcontracts of any tier. The terms contract,

contractor, and contracting officer, must be appropriately modified to preserve the Government's rights.

(g) Remedies. For breach of any of the above restrictions, or for intentional nondisclosure or misrepresentation of any relevant interest required to be disclosed concerning this contract or for such erroneous representations that necessarily imply bad faith, the Government may terminate the contract for default, disqualify the contractor from subsequent contractual efforts, and pursue other remedies permitted by law or this contract.

(h) Waiver. A request for waiver under this clause must be directed in writing to the contracting officer in accordance with the procedures outlined in 48 CFR 2009.570-9.

(i) Follow-on effort. The contractor shall be ineligible to participate in NRC contracts, subcontracts, or proposals therefor (solicited or unsolicited) which stem directly from the contractor's performance of work under this contract. Furthermore, unless so directed in writing by the contracting officer, the contractor may not perform any technical consulting or management support services work or evaluation activities under this contract on any of its products or services or the products or services of another firm if the contractor has been substantially involved in the development or marketing of the products or services.

(1) If the contractor under this contract, prepares a complete or essentially complete statement of work or specifications, the contractor is not eligible to perform or participate in the initial contractual effort which is based on the statement of work or specifications. The contractor may not incorporate its products or services in the statement of work or specifications unless so directed in writing by the contracting officer, in which case the restrictions in this paragraph do not apply.

(2) Nothing in this paragraph precludes the contractor from offering or selling its standard commercial items to the Government.

(End of Clause)

A.12 SECURITY REQUIREMENTS RELATING TO THE PRODUCTION OF REPORTS OR THE PUBLICATION OF RESULTS UNDER CONTRACTS, AGREEMENTS, AND GRANTS (JUL 2016)

Review and Approval of Reports

(a) Reporting Requirements. The contractor/grantee shall comply with the terms and conditions of the contract/grant regarding the contents of the draft and final report, summaries, data, and related documents, to include correcting, deleting, editing, revising, modifying, formatting, and supplementing any of the information contained therein, at no additional cost to the NRC. Performance under the contract/grant will not be deemed accepted or completed until it complies with the NRC's directions, as applicable. The reports, summaries, data, and related documents will be considered draft until approved by the NRC. The contractor/grantee agrees that the direction, determinations, and decisions on approval or disapproval of reports, summaries, data, and related documents created under this contract/grant remain solely within the discretion of the NRC.

(b) Publication of Results. Prior to any dissemination, display, publication, or release of articles, reports, summaries, data, or related documents developed under the contract/grant, the contractor/grantee shall submit them to the NRC for review and approval. The contractor/grantee shall not release, disseminate, display or publish articles, reports, summaries, data, and related documents, or the contents therein, that have not been reviewed and approved by the NRC for release, display, dissemination or publication. The contractor/grantee agrees to conspicuously place any disclaimers, markings or notices, directed by the NRC, on any articles, reports, summaries, data, and related documents that the contractor/grantee intends to release, display, disseminate or publish to other persons, the public, or any other entities. The contractor/grantee agrees, and grants, a royalty-free, nonexclusive, irrevocable worldwide license to the government, to use, reproduce, modify, distribute, prepare derivative works, release, display or disclose the articles, reports, summaries, data, and related documents developed under the contract/grant, for any governmental purpose and to have or authorize others to do so.

(c) Identification/Marking of Sensitive Unclassified Non-Safeguards Information (SUNSI) and Safeguards Information (SGI). The decision, determination, or direction by the NRC that information possessed, formulated or produced by the contractor/grantee constitutes SUNSI or SGI is solely within the authority and discretion of the NRC. In performing the contract/grant, the contractor/grantee shall clearly mark SUNSI and SGI, to include for example, OUO-Allegation Information or OUO-Security Related Information on any reports, documents, designs, data, materials, and written information, as directed by the NRC. In addition to marking the information as directed by the NRC, the contractor shall use the applicable NRC cover sheet (e.g., NRC Form 461 Safeguards Information) in maintaining these records and documents. The contractor/grantee shall ensure that SUNSI and SGI is handled, maintained and protected from unauthorized disclosure, consistent with NRC policies and directions. The contractor/grantee shall comply with the requirements to mark, maintain, and protect all information, including documents, summaries, reports, data, designs, and materials in accordance with the provisions of Section 147 of the Atomic Energy Act of 1954 as amended, its implementing regulations (10 CFR 73.21), Sensitive Unclassified Non-Safeguards and Safeguards Information policies, and NRC Management Directives and Handbooks 12.5, 12.6 and 12.7.

(d) Remedies. In addition to any civil, criminal, and contractual remedies available under the applicable laws and regulations, failure to comply with the above provisions, and/or NRC directions, may result in suspension, withholding, or offsetting of any payments invoiced or claimed by the contractor/grantee.

(e) Flowdown. If the contractor/grantee intends to enter into any subcontracts or other agreements to perform this contract/grant, the contractor/grantee shall include all of the above provisions in any subcontracts or agreements.

A.13 NRC INFORMATION TECHNOLOGY SECURITY

NRC INFORMATION TECHNOLOGY SECURITY TRAINING (MAY 2016)

NRC contractors shall ensure that their employees, consultants, and subcontractors with access to the agency's information technology (IT) equipment and/or IT services complete NRC's online initial and refresher IT security training requirements to ensure that their knowledge of IT threats, vulnerabilities, and associated countermeasures

remains current. Both the initial and refresher IT security training courses generally last an hour or less and can be taken during the employee's regularly scheduled work day.

Contractor employees, consultants, and subcontractors shall complete the NRC's online annual, "Computer Security Awareness" course on the same day that they receive access to the agency's IT equipment and/or services, as their first action using the equipment/service. For those contractor employees, consultants, and subcontractors who are already working under this contract, the on-line training must be completed in accordance with agency Network Announcements issued throughout the year, within three weeks of issuance of this modification.

Additional annual required online NRC training includes but is not limited to the following:

- (1) Information Security (INFOSEC) Awareness
- (2) Continuity of Operations (COOP) Awareness
- (3) Defensive Counterintelligence and Insider Threat Awareness
- (4) No FEAR Act
- (5) Personally Identifiable Information (PII) and Privacy Act Responsibilities Awareness

Contractor employees, consultants, and subcontractors who have been granted access to NRC information technology equipment and/or IT services must continue to take IT security refresher training offered online by the NRC throughout the term of the contract. Contractor employees will receive notice of NRC's online IT security refresher training requirements through agency-wide notices.

Contractor Monthly Letter Status Reports (MLSR) must include the following information for all completed training:

- (1) the name of the individual completing the course;
- (2) the course title; and
- (3) the course completion date.

The MLSR must also include the following information for those individuals who have not completed their required training:

- (1) the name of the individual who has not yet completed the training;
- (2) the title of the course(s) which must still be completed; and
- (3) the anticipated course completion date(s).

The NRC reserves the right to deny or withdraw Contractor use or access to NRC IT equipment and/or services, and/or take other appropriate contract administrative actions (e.g., disallow costs, terminate for cause) should the Contractor violate the Contractor's responsibility under this clause.

(End of Clause)

A.14 FOREIGN OWNERSHIP, CONTROL, OR INFLUENCE OVER CONTRACTOR

The National Industrial Security Program Operating Manual (NISPOM) implements the provisions of E.O. 12829, "National Industrial Security Program." A company is considered to be under FOCI whenever a foreign interest has the power, direct or indirect, whether or not exercised, and whether or not exercisable through the ownership of the U.S. company's securities, by contractual arrangements or otherwise, to direct or decide matters affecting the management or operations of that company in a manner that may result in unauthorized access to classified information or may adversely affect the performance of classified information contracts. (See NRC Management Directive 12.2 – "NRC Classified Information Security Program")

(a) For purposes of this clause, a foreign interest is defined as any of the following:

- (1) A foreign government or foreign government agency;
- (2) Any form of business enterprise organized under the laws of any country other than the United States or its possessions;
- (3) Any form of business enterprise organized or incorporated under the laws of the U.S., or a State or other jurisdiction within the U.S., which is owned, controlled, or influenced by a foreign government, agency, firm, corporation or person; or
- (4) Any person who is not a U.S. citizen.

(b) A U.S. company determined to be under FOCI is not eligible for facility clearance (FCL). If a company already has an FCL, the FCL shall be suspended or revoked unless security measures are taken to remove the possibility of unauthorized access to classified information.

(c) For purposes of this clause, subcontractor means any subcontractor at any tier and the term "contracting officer" shall mean NRC contracting officer. When this clause is included in a subcontract, the term "contractor" shall mean subcontractor and the term "contract" shall mean subcontract.

(d) The contractor shall complete and submit and SF-328, DD-441 and DD-441-1 forms, prior to contract award. The information contained in these forms may be used in making a determination as to whether a contractor is eligible to participate in the National Industrial Security Program and have a facility security clearance.

(e) The contractor shall immediately provide the contracting officer written notice of any changes in the extent and nature of FOCI over the contractor which would affect the answers to the questions presented in SF-328, "Certificate Pertaining to Foreign Interest". Further, notice of changes in ownership or control which are required to be reported to the Securities and Exchange Commission, the Federal Trade Commission, or the Department of Justice shall also be furnished concurrently to the contracting officer.

(f) In those cases where a contractor has changes involving FOCI, the NRC must determine whether the changes will pose an undue risk to the common defense and security. In making this determination, the contracting officer shall consider proposals made by the contractor to avoid or mitigate foreign influences.

(g) The contractor agrees to insert terms that conform substantially to the language of this clause including this paragraph (g) in all subcontracts under this contract that will require access to classified information and shall require such subcontractors to submit completed SF-328, DD-441 and DD-441-1 forms prior to award of a subcontract. Information to be provided by a subcontractor pursuant to this clause may be submitted directly to the contracting officer.

(h) Information submitted by the contractor or any affected subcontractor as required pursuant to this clause shall be treated by NRC to the extent permitted by law, as business or financial information submitted in confidence to be used solely for purposes of evaluating FOCI.

(i) The requirements of this clause are in addition to the requirement that a contractor obtain and retain the security clearances required by the contract. This clause shall not operate as a limitation on NRC's rights, including its rights to terminate this contract.

(j) The contracting officer may terminate this contract for default either if the contractor fails to meet obligations imposed by this clause, e.g., provide the information required by this clause, comply with the contracting officer's instructions about safeguarding classified information, or make this clause applicable to subcontractors, or if, in the contracting officer's judgment, the contractor creates a FOCI situation in order to avoid performance or a termination for default. The contracting officer may terminate this contract for convenience if the contractor becomes subject to FOCI and for reasons other than avoidance of performance of the contract, cannot, or chooses not to, avoid or mitigate the FOCI problem.

(End of Clause)

A.15 COMPLIANCE WITH U.S. IMMIGRATION LAWS AND REGULATIONS

NRC contractors are responsible to ensure that their alien personnel are not in violation of United States immigration laws and regulations, including employment authorization documents and visa requirements. Each alien employee of the Contractor must be lawfully admitted for permanent residence as evidenced by Permanent Resident Form I-551 (Green Card), or must present other evidence from the U.S. Department of Homeland Security/U.S. Citizenship and Immigration Services that employment will not affect his/her immigration status. The U.S. Citizenship and Immigration Services provides information to contractors to help them understand the employment eligibility verification process for non-US citizens. This information can be found on their website, <http://www.uscis.gov/portal/site/uscis>.

The NRC reserves the right to deny or withdraw Contractor use or access to NRC facilities or its equipment/services, and/or take any number of contract administrative actions (e.g., disallow costs, terminate for cause) should the Contractor violate the Contractor's responsibility under this clause.

(End of Clause)

A.16 PLACE OF DELIVERY-REPORTS

The items to be furnished hereunder shall be delivered, with all charges paid by the Contractor, to:

Electronic copies to:

[REDACTED]

[REDACTED]

(End of Clause)

A.17 INSPECTION AND ACCEPTANCE BY THE NRC (SEP 2013)

Inspection and acceptance of the deliverable items to be furnished hereunder shall be made by the NRC Contracting Officer's Representative (COR) at the destination, accordance with FAR 52.247-34 - F.o.b. Destination.

Contract Deliverables:

1. See Attachment 1 "Statement of Work" - Section 6 "Deliverables and Delivery Schedule"

(End of Clause)

A.18 BRANDING

The Contractor is required to use the statement below in any publications, presentations, articles, products, or materials funded under this contract/order, to the extent practical, in order to provide NRC with recognition for its involvement in and contribution to the project. If the work performed is funded entirely with NRC funds, then the contractor must acknowledge that information in its documentation/presentation.

Work Supported by the U.S. Nuclear Regulatory Commission (NRC), Office of Regulatory Research, under Contract/order number GS23F0110M - NRC-HQ-60-15-A-0001 - 31310018F0092.

(End of Clause)

A.19 PACKAGING AND MARKING

(a) The Contractor shall package material for shipment to the NRC in such a manner that will ensure acceptance by common carrier and safe delivery at destination. Containers and closures shall comply with the Surface Transportation Board, Uniform Freight Classification Rules, or regulations of other carriers as applicable to the mode of transportation.

(b) On the front of the package, the Contractor shall clearly identify the contract number under which the product is being provided.

(c) Additional packaging and/or marking requirements are as follows: N/A.

TASK ORDER STATEMENT OF WORK

TASK ORDER NO. 31310018F0092 under Contract No. NRC-HQ-60-15-Q-0001

1. PROJECT TITLE

TRACE Plant Model Development and Maintenance in Anticipation of New Rulemaking and Exploratory Simulations

2. BACKGROUND

One of the mission directives of the Office of Nuclear Regulatory Research (RES) is to provide the appropriate analytical tools for identifying and resolving safety issues. In the area of reactor thermal hydraulics, RES has developed and maintains the TRAC/RELAP Advanced Computational Engine (TRACE) along with a collection of plant models in native TRACE format to perform a range of thermal-hydraulic analyses. These analyses include confirmatory calculations related to design certifications and the auditing of justifications provided by licensees seeking licensing amendments. Taken together, the latest version of TRACE and a full complement of plant input models gives the agency more agility to respond to new rulemaking, exploratory simulations, or any other emergent thermal-hydraulic analytical need.

Over the past decade, a number of steps have been taken to make TRACE and the assortment of input models a more viable analysis tool. TRACE has evolved, through a series of code versions, to expand its applicability and to become more accurate and robust. In conjunction with that evolution, 16 plant models were developed that represent most of the different types of nuclear steam supply systems (NSSS) and containment designs currently in operation. More recently, the TRACE Pressurized Water Reactor (PWR) Modeling Guidelines was developed to foster some standardization in plant-model construction and thereby reduce modeling errors made by TRACE users.

As a result of the past efforts, the use of TRACE and the collection of plant models has increased significantly and has played a vital role in ensuring reactor safety. However, more plant-model development and plant-model maintenance are necessary to fortify the TRACE plant-model collection. With respect to model development, plant models that represent the NSSS and containment designs missing from the plant-model collection must be developed. The decks currently missing from the collection include a variety of plants across the five BWR product lines, a raised-loop Babcock & Wilcox (B&W), and a PWR with an ice condenser containment.

Maintenance of the plant models that are currently in the collection is necessary because all of those models were developed using modeling practices and component nodalizations

considered appropriate for a particular code version. With the continued enhancement of TRACE over the years, there has been a departure from some of the modeling practices and components that were previously proposed. Therefore, the currently available plant models, along with the corresponding documentation, must be updated in accordance with the latest TRACE PWR Modeling Guidelines, which corresponds with TRACE Version Patch 4.

3. SCOPE

The contractor shall provide technical assistance in the updating, verifying, and documenting of the TRACE models for H.B. Robinson Unit 2, Saint Lucie Units 1 and 2, and Callaway Unit 1. Additionally, the contractor shall update the MAKECHAN-2 computer code and develop user guidelines for using the TRACE CHAN and Containment components.

The H.B. Robinson, Saint Lucie Units 1 and 2, and Callaway TRACE models shall be updated in accordance with the latest version of the TRACE PWR Modeling Guidelines. All models shall be verified by performing steady-state and transient calculations, and the modeling details and simulation results for each model shall be documented in a calculation notebook and analysis report, respectively.

4. APPLICABLE DOCUMENTS AND STANDARDS

Applicable documents include the following:

- TRACE PWR User Guidelines (Rev.1)
- TRACE Theory Manual Patch V
- TRACE User's Manual Patch V
- H.B Robinson Updated Final Safety Analysis Report (UFSAR) (Rev.23)
- Saint Lucie-2 UFSAR (Rev. 22)
- Callaway (UFSAR) (Rev. 19)
- Draft TRACE Containment Guidelines

5. SPECIFIC TASKS

Task 1: Update the H. B. Robinson TRACE Model and Develop Corresponding Calculation Notebook

Task 1.1 Update H. B. Robinson TRACE Model

The contractor shall modify each component, control system, and boundary condition currently employed in the H. B. Robinson TRACE model to produce a complete, base H. B. Robinson model and two transient restart cases that adhere to the latest TRACE PWR User Guidelines. The base model shall

contain the requisite nodalization, input specifications, and intended functionality. The restart cases shall be loss-of-coolant accidents (LOCAs), one a large-break LOCA (LBLOCA) and the other a spectrum of small-break LOCA (SBLOCA) cases, each of which are to be developed as separate cases using the graphical editing mode in SNAP. The SBLOCA spectrum shall be configured as a single case that includes eight break sizes: 2, 2.5, 3, 3.5, 4, 4.5, 5, and 6 inches. If accuracy or robustness issues arise, alternative modeling methods may be explored after consultation with the NRC COR.

The contractor shall perform demonstration calculations to verify the inputs and demonstrate the operability of the base-model steady state and the LOCA models. The results from these demonstration calculations shall be documented in an analysis report. For the SBLOCA spectrum, the analysis shall focus on the break sizes that yield the most limiting results.

Task 1.2 Develop a Calculation Notebook for the H. B. Robinson TRACE Model

The contractor shall use all available plant information to create a separate, stand-alone calculation notebook that completely describes the H. B. Robinson TRACE model. The notebook shall be structured in a manner similar to the Vogtle Calculation Notebook, such that there is a graphical depiction of each major component showing the relevant dimensions and that there is sufficient text to describe all modeling assumptions, the rationale behind input-parameter selections, and the sources of all plant-model input. The notebook shall include all information necessary to assemble the H. B. Robinson model, to include the modifications made to bring the model into compliance with the TRACE PWR User Guidelines.

Deliverable: The contractor shall provide a single SNAP (*.med) file that contains the base H. B. Robinson TRACE model and the two transient cases as described above, along with the corresponding calculation notebook and analysis report.

Task 2: Update the St. Lucie Unit 1 and Unit 2 TRACE Models and Develop a Corresponding Calculation Notebook that Describes Both

Task 2.1 Update TRACE Models for St. Lucie Unit 1 and Unit 2

The contractor shall modify each component, control system, and boundary condition currently employed in the TRACE models of St. Lucie Unit 1 and Unit 2 to produce complete, base St. Lucie models and two transient restart cases that adhere to the latest TRACE PWR User Guidelines. The primary differences

between Units 1 and 2 are the height of the core and the number of fuel rods per assembly. Therefore, only the core shall differentiate the two TRACE models.

The base models shall contain the requisite nodalization, input specifications, and intended functionality. The restart cases shall be loss-of-coolant accidents (LOCAs), one a large-break LOCA (LBLOCA) and the other a spectrum of small-break LOCA (SBLOCA) cases, each of which are to be developed as separate cases using the graphical editing mode in SNAP. The SBLOCA spectrum shall be configured as a single case that includes eight break sizes: 2, 2.5, 3, 3.5, 4, 4.5, 5, and 6 inches. If accuracy or robustness issues arise, alternative modeling methods may be explored after consultation with the NRC COR.

The contractor shall perform demonstration calculations to verify the inputs and demonstrate the operability of the base-model steady state and the LOCA models. The results from these demonstration calculations shall be documented in an analysis report. For the SBLOCA spectrum, the analysis shall focus on the break sizes that yield the most limiting results.

Task 2.2 Develop a Calculation Notebook for the St. Lucie TRACE Model

The contractor shall use all available plant information to create a separate, stand-alone calculation notebook that completely describes both St. Lucie Unit 1 and Unit 2 TRACE models. The notebook shall be structured in a manner similar to the Vogtle Calculation Notebook, such that there is a graphical depiction of each major component showing the relevant dimensions and that there is sufficient text to describe all modeling assumptions, the rationale behind input-parameter selections, and the sources of all plant-model input. The notebook shall include all information necessary to assemble models of both St. Lucie units, to include the modifications made to bring the models into compliance with the TRACE PWR User Guidelines. The primary differences between Units 1 and 2 are the height of the core and the number of fuel rods per assembly. Therefore, only the core shall differentiate the two TRACE models.

Deliverable: The contractor shall provide two SNAP (*.med) files, one for Unit 1 and the other for Unit 2. Each file shall contain the respective base St. Lucie TRACE model and the two transient cases as described above. Only one calculation notebook need be delivered, with the core of each unit described therein. One analysis report shall be delivered, but it shall contain the results for both units.

Task 3: Update the Callaway TRACE Model and Develop Corresponding Calculation Notebook

Task 3.1 Update Callaway TRACE Model

The contractor shall modify each component, control system, and boundary condition currently employed in the Callaway TRACE model to produce a complete, base Callaway model and two transient restart cases that adhere to the latest TRACE PWR User Guidelines. The base model shall contain the requisite nodalization, input specifications, and intended functionality. The restart cases shall be loss-of-coolant accidents (LOCAs), one a large-break LOCA (LBLOCA) and the other a spectrum of small-break LOCA (SBLOCA) cases, each of which are to be developed as separate cases using the graphical editing mode in SNAP. The SBLOCA spectrum shall be configured as a single case that includes eight break sizes: 2, 2.5, 3, 3.5, 4, 4.5, 5, and 6 inches. If accuracy or robustness issues arise, alternative modeling methods may be explored after consultation with the NRC COR.

The contractor shall perform demonstration calculations to verify the inputs and demonstrate the operability of the base-model steady state and the LOCA models. The results from these demonstration calculations shall be documented in an analysis report. For the SBLOCA spectrum, the analysis shall focus on the break sizes that yield the most limiting results.

Task 3.2 Develop a Calculation Notebook for the Callaway TRACE Model

The contractor shall use all available plant information to create a separate, stand-alone calculation notebook that completely describes the Callaway TRACE model. The notebook shall be structured in a manner similar to the Vogtle Calculation Notebook, such that there is a graphical depiction of each major component showing the relevant dimensions and that there is sufficient text to describe all modeling assumptions, the rationale behind input-parameter selections, and the sources of all plant-model input. The notebook shall include all information necessary to assemble the Callaway model, to include the modifications made to bring the model into compliance with the TRACE PWR User Guidelines.

Deliverable: The contractor shall provide a single SNAP (*.med) file that contains the base Callaway TRACE model and the two transient cases as described above, along with the corresponding calculation notebook and analysis report.

Task 4: Update MAKECHAN-2 to accept FAST Output

Currently, MAKECHAN-2 has a simplistic implementation that assumes that the burnup distribution is the same as the power distribution. The contractor shall modify this implementation in MAKECHAN-2 to make possible a rod-group-by-axial-interval matrix implementation that allows for the extraction of all burnup and as-fabricated fuel rod design parameters needed to complete the detailed fuel rod models in TRACE CHAN components and ensure consistency between the FAST and TRACE fuel rod designs. In addition, the contractor shall modify MAKECHAN-2 to obtain the gap-gas information from FAST by rod group.

Task 5: Create BWR User Guidelines for the TRACE CHAN and Containment Components

Using the PWR User Guidelines as a template - and any available best-practice information, TRACE user guidance, and relevant modeling experience - assemble user guidelines for developing BWR CHAN and Containment components in TRACE. The guidelines for the CHAN and the Containment components shall be separate chapters and shall provide instruction on the recommended methods, including TRACE hydraulic-component selections, nodalization, and component-option selections, necessary to assemble CHANs and Containments, respectively. The information shall be presented in a manner similar to that provided in the TRACE PWR User Guidelines, and schematics and tables shall be used, as necessary, to provide clarity.

6. DELIVERABLES AND DELIVERY SCHEDULE

Table 1 Deliverables

Tasks	Delivery Dates		Deliverables
	Preliminary Deliverables	Final Deliverables	
Task 1	8 months receipt of requisite information from NRC COR	2 months after receipt of NRC comments on draft deliverables, but no later than the last date of the period of performance.	The contractor shall provide the TRACE plant model for H. B. Robinson and corresponding calculation notebook and analysis report for review and comment after the delivery of preliminary and final deliverables.
Task 2	9 months after receipt of requisite information from NRC COR	2 months after receipt of NRC comments on draft deliverables, but no	The contractor shall provide the TRACE plant models for St. Lucie Units 1 and 2, along with corresponding calculation notebook

		later than the last date of the period of performance.	and analysis report, for review and comment after the delivery of preliminary and final deliverables.
Task 3	9 months receipt of requisite information from NRC COR	2 months after receipt of NRC comments on draft deliverables, but no later than the last date of the period of performance.	The contractor shall provide the TRACE plant model for Callaway and corresponding calculation notebook and analysis report for review and comment after the delivery of preliminary and final deliverables.
Task 4	2 month receipt of requisite information from NRC COR	1 month after receipt of NRC comments on draft deliverables, but no later than the last date of the period of performance.	The contractor shall provide the updated versions of the MAKECHAN-2 computer code and corresponding MAKECHAN user's manual for review and comment after the delivery of preliminary and final deliverables.
Task 5	4 months receipt of requisite information from NRC COR	2 months after receipt of NRC comments on draft deliverables, but no later than the last date of the period of performance.	The contractor shall provide user guidelines for the TRACE CHAN and Containment components for review and comment after the delivery of preliminary and final deliverables.

7. GOVERNMENT-FURNISHED PROPERTY

- H. B. Robinson TRACE Model
- St. Lucie TRACE Model
- Callaway TRACE Model
- TRACE 5.1160 and applicable upgrades
- SNAP Version 2.6.1 or later

8. PLACE OF PERFORMANCE

All work will be done at the contractor's site.

9. SECURITY

All work related to this task order shall be PROPRIETARY.
