

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION IV
1600 E. LAMAR BLVD
ARLINGTON TX 76011-4511

August 27, 2018

Stephen T. Ward
Radiation Safety Officer
SCST, Inc.
6280 Riverdale St
San Diego, CA 92120

SUBJECT: LICENSE AMENDMENT

Dear Mr. Ward:

This letter refers to the Nuclear Regulatory Commission's (NRC) review of the change of control and/or transfer of control/ownership amendment request that was submitted to the NRC Region IV office by Hogan Lovells US LLP, in a letter dated July 11, 2018. The change of control and/or transfer of control/ownership supporting documentation stated that a transfer of control between SCST, Inc. ("SCST") and Atlas Technical Consultants LLC ("Atlas") (collectively, the "Applicants"), occurred on August 17, 2018. The transfer of control would occur upon the closing of a planned transaction ("Closing") under which (i) SCST would transfer its assets to a wholly-owned subsidiary, SCST, LLC, created prior to the Closing to effectuate the transaction; and then immediately thereafter (ii) Atlas would acquire SCST, LLC. Atlas is itself a subsidiary of investment funds managed by Bernard Capital Partners Management LP ("Bernard Capital")

Post-Closure the merger will result in the name change from SCST, Inc. to SCST, LLC and SCST will notify the NRC via an amendment request to change the name of the license to SCST, LLC. Additionally, the change of control and/or transfer of control/ownership documentation stated that SCST, LLC agrees to abide by all statements, representations, procedures, conditions, and commitments made by the Applicants.

An environmental assessment for this licensing action is not required since this action is categorically excluded under 10 CFR 51.22(c)(10)(v), and 14(viii). You should review this license carefully and be sure that you understand all conditions. You can contact me at (817) 200-1286 if you have any questions about this license.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement is not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address:
<http://www.nrc.gov/about-nrc/regulatory/enforcement/enforce-pol.html>.

An electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web site at <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/
