3. United States Nuclear Regulatory Commission Letter EPID L-2017-LLA-0371, "Grand Gulf Nuclear Station, Unit 1 – Request for Additional Information Related to Incorporate the Tornado Missile Risk Evaluator into Licensing Basis", dated July 20, 2018.

Dear Sir or Madam:

By letter dated July 20, 2018, Nuclear Regulatory Commission (NRC) sent a Request for Additional Information (RAI) related to incorporation of the Tornado Missile Risk Evaluator (TMRE) into the Grand Gulf Nuclear Station (GGNS) licensing basis. Recent changes in the Missile Impact Parameter values in the model have resulted in the need to reanalyze the GGNS TMRE. As discussed in a telephone conference on September 7, 2018, with Eva Brown, the NRC Project Manager, this will result in a delay in the GGNS RAI response from September 24, 2018 to October 24, 2018.

Should you have any questions concerning the content of this letter, please contact Douglas Neve, Manager Regulatory Assurance, at 601-437-2103.

Sincerely,

A handwritten signature in cursive script that reads "Eric A. Larson".
