

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

September 25, 2018

MEMORANDUM TO: The File

FROM: Stephen Baker   
Export Controls and Nonproliferation Branch  
Office of International Programs

SUBJECT: REVISION OF APPLICATION FOR ASSURANCES XSNM3796,  
DOCKET NO.: 11006323

On September 18, 2018, and on behalf of the U.S. Department of Energy, the applicant's point of contact, Becky Eddy, submitted a revised first page to export license application XSNM3796. This revision eliminated the request to export zircalloy-4 tubing to Canada (we instructed the applicant to file for that license under a separate application).

While the first page of application XSNM3796 was revised to remove the reference to zircalloy-4 tubing, all of the other pages of the application, including the original cover letter, remain unchanged, and therefore still mention zircalloy-4 tubing.

This note is written to make certain that the request for Assurances being sent to the Executive Branch on September 25, 2018, will only be considering approval for the export of low-enriched uranium to Canada.
