

## UNITED STATES NUCLEAR REGULATORY COMMISSION

REGION III 2443 WARRENVILLE RD. SUITE 210 LISLE, IL 60532-4352

SEP 25 2018

Kelly Wegener-Gave Radiation Safety Officer The Dow Chemical Company 1803 Building Midland, MI 48674

Dear Ms. Wegener-Gave:

In letter dated June 18, 2018 (ML18178A382, including attachments), you contacted the U.S. Nuclear Regulatory Commission and indicated that you wished to terminate NRC License No. 21-08362-12. In letter dated September 24, 2018 (ML18268A040, including attachments), you submitted additional information confirming that all residual licensed material from Dow Corning Corporation had been transferred to another NRC licensee – The Dow Chemical Company, NRC Lic. No. 21-00265-06.

Based on its review, the staff has concluded that all licensable radioactive material used or stored at the licensee's facilities located at 3901 S Saginaw Rd., Midland, MI, and has been removed from the above referenced license. Based on these conclusions no further remediation or actions with respect to NRC regulated material are required. Your facilities are suitable for use by another NRC licensee and NRC license number 21-08362-12 is hereby terminated. A copy of the terminated license – Amendment No. 30 – is enclosed.

In accordance with Title 10 of the Code of Federal Regulations Section 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <a href="http://www.nrc.gov/reading-rm/adams.html">http://www.nrc.gov/reading-rm/adams.html</a>. If you have any questions, please contact me at (630) 829-9887.

Sincerely,

Sara A. Forster, M.S.
