

UNITED STATES NUCLEAR REGULATORY COMMISSION REGION III 2443 WARRENVILLE RD. SUITE 210 LISLE, IL 60532-4352

SEP 2 5 2018

Kelly Wegener-Gave Radiation Safety Officer Dow Corning Corporation 2200 W Salzburg Rd. Auburn, MI 48611

Dear Ms. Wegener-Gave:

Enclosed is a corrected copy of Amendment No. 33 to your NRC Material License No. 21-08362-08. In accordance with a recent internal review of your file, and your August 16, 2018 phone conversation with my colleague, Michael LaFranzo, we have noted that Condition No. 10 included an incorrect street number for your licensed facilities.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9807 so that we may provide appropriate corrections and answers.

In addition, in your letter dated June 18, 2018 you requested to terminate your radioactive materials license, NRC License No. 21-08362-08. Your letter may be found at the NRC's Agencywide Documents Access and Management System (ADAMS), Accession No. ML18178A382. We have noted that, in your letter dated September 24, 2018, you withdrew your request to terminate this license and transfer it to another license, as no primary activities are being conducted in facilities authorized for use under the license. Your second letter may be found at the NRC's Agencywide Documents Access and Management System (ADAMS), Accession No. Accession No. ML18268A040.

You may refer to NUREG 1556, Vol. 7, rev. 1, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Academic, Research and Development, and Other Licenses of Limited Scope, Including Electron Capture Devices and X-Ray Fluorescence Analyzers;" NUREG 1757, Vol. 1, rev. 2, "Decommissioning Process for Materials Licensees;" and NUREG 1757, Vol. 2, rev. 1, "Characterization, Survey, and Determination of Radiological Criteria;" when preparing your future request to terminate this license.

These volumes may be found at the websites: <u>http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v7;</u> <u>https://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1757/v1;</u> and https://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1757/v2.

K. Wegener-Gave

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In resubmitting your request, please be reminded that 10 CFR 30.9 and 30.10 require that information provided to the Commission by a licensee to be complete and accurate in all material aspects. Deliberate submittal of incomplete or inaccurate information that is material to the Commission could subject the licensee to enforcement action.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <u>http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html</u>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390, a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <u>http://www.nrc.gov/reading-rm/adams.html</u>. If you have any questions, please contact me at (630) 829-9892.

Sincerely,

Jan a Frish

Sara A. Forster, M.S. Health Physicist Materials Licensing Branch
