LISLE, IL 60532-4352

SEP 25 2018

Kelly Wegener-Gave
Radiation Safety Officer
The Dow Chemical Company
1803 Building
Midland, MI 48674

Dear Ms. Wegener-Gave:

Enclosed is Amendment No. 94 to your NRC Material License No. 21-00265-06 in accordance with your June 18, 2018 request, with the exception of adding the 2200 W Salzburg Rd. location of use currently listed on NRC Material License No. 21-08362-08. This document may be found in our NRC Agencywide Documents Access and Management System (ADAMS) at accession number ML18178A382.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9807 so that we may provide appropriate corrections and answers.

As discussed in our September 5, 2018 phone conversation, the 2200 W Salzburg Rd. location cannot be added to your NRC Material License No. 21-00265-06 until it is removed from your NRC Material License No. 21-08362-08. Although you originally requested to terminate that license, we have noted that your request to terminate NRC License No. 21-08362-08 via letter dated September 24, 2018. This document may be found in our NRC Agencywide Documents Access and Management System (ADAMS) at accession number ML18268A040.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

K. Wegener-Gave
