NRC Letter, *Brunswick Steam Electric Plant Units 1 and 2 - Staff Assessment of Response to 10 CFR 50.54(f) Information Request Flood-Causing Mechanism Reevaluation (EPID Nos. 000495/05000325/L-2015-JLD-0007 and 000495/05000324/L-2015-JLD-0008)*, dated April 16, 2018, ADAMS Accession No. ML18089A055

Ladies and Gentlemen:

On March 12, 2012, the Nuclear Regulatory Commission (NRC) issued Reference 1 to request information associated with Near-Term Task Force (NTTF) Recommendation 2.1 for Flooding. One of the required responses in Reference 1 directed licensees to submit a Flood Hazard Reevaluation Report (FHRR). On March 1, 2013, the NRC issued Reference 2 to provide supplemental information to the request. The FHRR for Brunswick Steam Electric Plant (BSEP), Units 1 and 2, was submitted on March 11, 2015 (i.e., Reference 3).

Following the Commission's directive to NRC Staff (i.e., Reference 4), the NRC issued a letter to industry (i.e., Reference 5) indicating that guidance is being prepared to replace existing instructions and provide for a "graded approach to flooding reevaluations and provide for more focused evaluations of local intense precipitation and available physical margin in lieu of proceeding to an integrated assessment."

Guidance for performing flooding reevaluations is contained in Reference 6, which has been endorsed by the NRC in Reference 7. Reference 6 indicates that each flood-causing mechanism that is not bounded by the design basis flood (i.e., using only stillwater and/or wind-wave run-up levels) shall follow one of the following five assessment paths:

- Path 1: Demonstrate Flood Mechanism is Bounded
- Path 2: Demonstrate Effective Flood Protection
- Path 3: Demonstrate a Feasible Response to Local Intense Precipitation (LIP)
- Path 4: Demonstrate Effective Mitigation
- Path 5: Scenario Based Approach

Non-bounded flood-causing mechanisms in Paths 1, 2, or 3 require a Focused Evaluation to complete the actions related to external flooding required by Reference 1. Mechanisms in Paths 4 or 5 require an Integrated Assessment. The enclosure to this letter provides the Flooding Focused Evaluation Summary for BSEP.

The flooding analysis described in References 8, 9 and 10 was utilized as an input to this Flooding Focused Evaluation. The Flooding Focused Evaluation reaffirms that BSEP has reliable, passive protection of key structures, systems, and components (SSCs) to maintain key safety functions (KSFs).

The Flooding Focused Evaluation follows Path 2 of Reference 6 and utilized Appendices B and C of Reference 6 for guidance on evaluating the site protection features. This submittal completes the actions related to external flooding required by Reference 1.

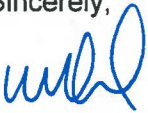

The purpose of this letter is to provide the BSEP, Unit Nos. 1 and 2, Flooding Focused Evaluation Summary Report. Enclosure 1 provides the report.

This letter contains new regulatory commitments. Enclosure 2 provides a list of these commitments.

If you have any questions regarding this submittal, please contact Mr. Lee Grzeck, Manager - Regulatory Affairs, at (910) 832-2487.

I declare under penalty of perjury that the foregoing is true and correct.
Executed on September 27, 2018.

Sincerely,

William R. Gideon
