

FEMA

September 11, 2018

Mr. Kriss M. Kennedy
U.S. Nuclear Regulatory Commission, Region IV
1600 E. Lamar Blvd.
Arlington, TX 76011-4511

Dear Mr. Kennedy:

Enclosed is a copy of the After Action Report/Improvement Plan for the River Bend Station Exercise evaluated on June 27, 2018.

Based on the evaluation of this exercise by FEMA Region 6 staff and a team of federal evaluators; the State of Louisiana and local governments successfully demonstrated the capability to implement their offsite radiological emergency response plans and procedures.

There were no Level 1 Findings, two Level 2 Findings that were corrected during the exercise, and one Plan Issue identified during the exercise. Also, one previous Level 2 Finding was resolved during the exercise.

Therefore, we find that state and local preparedness is adequate to protect the health and safety of the public living in the vicinity of the River Bend Station and there is reasonable assurance that appropriate measures can be taken offsite in the event of a radiological emergency.

If you have any questions regarding this matter, please contact Nan Williams, FEMA Region 6 Regional Assistance Committee Chair at (940) 898-5398, or Timothy Pflieger, River Bend Station Site Specialist, at (940) 383-7325.

Sincerely,

A handwritten signature in black ink that reads "George A. Robinson".

George A. Robinson
Regional Administrator
